RE: Surface Commingling, Lease Commingling,  
Off-Lease Storage and Measurement  
Dagger Draw Upper Penn, North  
Eddy County, New Mexico

Dear Ben:

Yates Petroleum Corporation respectfully requests administrative approval to amend Commingling Order CTB-380 (a copy of which is enclosed) to add the Ross EG Federal Com #13, a new well, to the commingling order. This well is located 1980' FSL and 660' FEL (Unit I, NESE) of Section 20-T19S-R25E, Eddy County, New Mexico. This well is commingled with the Hooper AMP #1, Hooper AMP #2, Hooper AMP Com #3, Hooper AMP Com #4, Patriot AIZ Com #3 and the Lorene ANN #1. A complete description of these well is shown on Attachment I.

The production from these wells is transported prior to measurement to a common tank battery located at the Hooper AMP #1 location.

The purpose of the surface commingling, lease commingling, off-lease storage and measurement is to reduce operating costs for storage and treating, thereby extending the economic life of each well. Without approval for utilizing existing batteries on adjacent leases, it will become necessary to build separate facilities for each well. This will greatly increase costs and shorten the economic life of the wells.

Because working interests for the wells are different, oil from each of the wells will be measured by positive displacement, temperature compensated metering equipment prior to surface commingling. Gas from the wells will also be metered separately. This metering will ensure that all production from each of the wells is equitably accounted for with no significant effect on your revenue. The production is from the same producing zone which is the Canyon.

Surface Commingling, Etc.
