*Case 12102*

Dear Ms. Ripley:

We have received your letter of April 28, 1997, wherein you requested our approval for surface commingling of production from the above wells.

We understand that production from the subject wells will be commingled at the Monument '12' State Well No. 3 tank battery located in the SW/4 of Section 12-19S-36E. Oil from each of the wells will be measured by metering equipment prior to surface commingling. Gas from the wells will also be metered separately.

Since it appears that there will be no loss of revenue to the State of New Mexico's beneficiaries as a result of your proposed operation, your request is hereby approved. Our approval is given with the understanding that the Commissioner of Public Lands reserves the right to amend or withdraw his approval, should this operation prove to be unprofitable to the state at any time in the future. Also, our approval is subject to like approval by the New Mexico Oil Conservation Division. Please submit a copy of the New Mexico Oil Conservation Division's approval.

Your \$30.00 filing fee has been received.
