Aztec, New Mexico 87410

Dear Mr. LeMay:

Union Oil Company of California d.b.a. UNOCAL requests approval to down-hole commingle hydrocarbon production from the Largo Gallup and Basin Dakota formations in the following Rincon Unit wells, Rio Arriba County, New Mexico.

<u>Well</u>	<u>Legal Location</u>
164E	860' FNL, 1150' FWL, S2, T26N, R7W

The 164E was drilled in October of this year and completed in the Dakota and Gallup formations with 4-1/2" production casing and one string of 2-3/8" tubing with a packer isolating the Dakota and Gallup formations. In the planning of this well it was anticipated that the Gallup would flow up the 4-1/2" x 2-3/8" annulus. At the present time the GL zone is loaded up with oil and will not flow up the annulus. A production tests was conducted this week and pressure and fluid data gathered as follows.

<u>ZONE</u>	<u>**SITP</u>	<u>**SICP</u>	<u>FLUID ABOVE MID PERFS</u>	<u>*CALC BHP</u>	<u>GAS Mcf/d</u>
DK	1000 psig	-----	No Fluid	1190	200
GL	-----	350 psig	900 ft	690	0

* DK - 190 psi static 0.70 gas gradient
 GL- 60 psi static 0.70 gas gradient, 0.314 psi/ft oil gradient
 Datum - GL midperfs @ 6600'
 **Seven day shut-in pressure.

This is a state lease and the ownership in the Dakota and Gallup are identical. Unocal is confident that cross-flow and production waste will not result between the Dakota and Gallup reservoirs in 164E while producing under down-hole commingled conditions.

Upon receipt of commingle authorization UNOCAL will isolate and flow test, up 2-3/8" tubing, the Gallup interval and submit to your office for approval a Dakota and Gallup allocation factor for oil, gas and water production.

An application to surface commingle condensate production from this well was submitted to your office in the last week of October. Please consider that request withdrawn.

If you have any questions in regard to this application, please contact me at (505) 632-1811 ext.14. Thank you for your consideration in this matter.

Sincerely,

Union Oil Company of California
 d.b.a. UNOCAL
