RE: Correction Letter
Federal Lease NM03380
Surface Commingling Application
No. 68 Florance, Basin Dakota Pool
1190' FSL and 2510' FEL
No. 4A Florance "D" LS, Blanco Mesaverde Pool
1310' FSL and 2190' FEL
Section 20, T. 27 N., R. 8 W.
San Juan County, New Mexico

Dear Ms. Staley:

The Farmington District Office (FDO) of the Bureau of Land Management (BLM) has received your letter dated February 7, 1996, for surface commingling of the above referenced wells.

The Florance 68 is presently producing 25 MCFPD with 0.3 BCPD and the Florance D LS #4A is expected to produce 155 MCFPD and .7 BCPD. Allocation will be determined for the Mesaverde using quarterly testing for the first year, and annual testing for the Dakota. Subsequent to the first year, annual production test will be conducted for each well.

To surface commingle two wells located on the same Federal lease, no prior approval is necessary unless the lease is communitized or unitized with other leases. Approval to surface commingle is granted, however we would appreciate that once determined, that you submit allocation factors for these wells.

If you have further questions regarding this matter, please contact Brian W. Davis at (505) 599-6367 or (505) 599-8900.

Sincerely,

[Handwritten signature]

Duane W. Spencer
