Re: Surface Commingling, Off lease storage and measurement of
Hydrocarbon Production for:
McIntyre A #1, #3 & #9
Section 20, T17S, R30E
Eddy County, New Mexico

Mack Energy Corporation as operator of the aforementioned leases respectfully requests administrative approval for surface commingling, off lease storage and measurement of production.

It is requested that surface commingling be approved for "Loco Hills Paddock" production from the McIntyre A #1 in the NE/4 SE/4 Section 20, T17S, R30E (State of NM Lease NMLC054280), McIntyre A #3 in the NW/4 SE/4 Section 20, T17S, R30E (State of NM Lease NMLC057634), and "Grayburg Jackson SR QN GB SA" production from the McIntyre A #9 in the NW/4 SE/4 Section 20, T17S, R30E (State of NM Lease NMLC057634).

Mack Energy proposes to surface commingle Loco Hills Paddock and Grayburg Jackson SR QN GB SA production at a central battery located at SE/4 SW/4, Sec. 17, T17S, R30E. We will conduct well tests to determine production. The attached site facility diagram illustrates the typical separation equipment and the proposed production battery.

Mack Energy has made notification to all parties owning an interest in these leases, including the oil purchaser, of the intent to commingle. Attached, as part of this application is an approved copy of the sundry notice to the BLM.

Mack Energy Corporation is respectfully requesting administrative approval of this application for surface commingling. Should you require any additional information concerning this application, please call Robert C. Chase at the above number. Thank you for your consideration of this request.

Sincerely,

Robert C. Chase
Vice President

Continued:

The proposed operation is described in detail on the attached diagrams.

A map is enclosed showing the lease numbers and location of all leases and wells that will contribute production to the proposed commingling/common storage facility. All unitized/communitized areas, producing zones/pools are also clearly illustrated.

A schematic diagram is also attached which clearly identifies all equipment that will be utilized.

The storage and measuring facility is located at SE/SW-1/4, Sec. 17 T 17 S, R 30 E, on lease No. NM-86025 EDDY County, New Mexico. BLM will be notified if there is any future change in the facility location.

Details of the proposed method for allocating production to contributing sources is as follows:

Mack Energy has added a test facility and will conduct well tests to make sure allocation is correct

The working interest owners have been notified of the proposal.

The proposed commingling of production is in the interest of conservation and will not result in reduced royalty or improper measurement of production.

The proposed commingling is necessary for continued operation of the above referenced Federal leases.

We understand that the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. And, we will submit within 30 days an application for right-of-way approval to the BLM's Realty Section in your office if we have not already done so.

Additional wells require additional commingling approvals.
