Re: Ingram Federal 43-16 & Howard Federal 43-15

Gentlemen:

RB Operating Company requests a surface commingling exception for the above referenced wells.

Enclosed you will find a plat and a copy of the working interest owners in both wells each of which has been notified of this request.

If there are any questions regarding this request, please notify Tim Goudeau at (915) 682-0095.

Yours very truly,

RB OPERATING COMPANY

Tim Goudeau
Southern Region Manager

RE: *Additional Information Required
Surface Commingling Applications
Ingram/Howard Federal Leases*

Sir:

Your application is being returned so additional information may be acquired and submitted simultaneously. Required information for surface commingling operations is detailed in Division Rule 303.B.(2):

...The application must contain detailed data as to the gravities of the liquid hydrocarbons, the values thereof, and the volume of the liquid hydrocarbons production from each pool, as well as the expected gravity and value of the commingled liquid hydrocarbons production... ...The application shall also state specifically whether the actual commercial value of such commingled production will be less than the sum of the values of the production from each common source of supply and, if so, how much less.

Additionally, all royalty interest owners should be notified by certified mail and copies of such receipts included as part of the application. Further, as these are federal leases, the Farmington office of the Bureau of Land Management must also receive the application for their like approval.

Please let me know if I may be of any assistance.

Very truly yours,

A handwritten signature in black ink, appearing to read "Benjamin E. Stone".
