Re: NMOCD Commingling Orders R-10655-A and PLC-173
Add five wells to Dugan's Com No. 1E CDP
Dugan Production's Tabor Gathering System

Dear Mr. Ashley and Mr. Chavez,

In an application dated 3/29/00 and approved by Order R-10655-A we proposed the addition of Dugan's Com No. 4, Federal I No. 99 and Tabor Com No. 90. Dugan's application dated 6/30/00 and approved by Commingling Order PLC-173 proposed the addition of Dugan's Jiggs No. 1 and No. 2 wells.

The captioned commingling orders included a stipulation that similar approvals were also obtained from the Bureau of Land Management (BLM) and the New Mexico State Land Office (NMSLO). Copies of approvals from both agencies are attached for your information and file.

The commingling order also stipulated that we advise the Aztec office of the NMOCD upon implementation of commingling. The Com No. 1E CDP (El Paso meter No. 90-887) was placed into service on 9/13/96 with Dugan's Com No. 1E and No. 2 producing. The Com No. 4 and Federal I No. 99 wells were added on 6/16/00. The Tabor Com No. 90 and Jiggs No. 1 and No. 2 wells will be added at later dates.

Should you have questions, please let me know.

Sincerely,

A handwritten signature in cursive script that reads "John D. Roe".

Re: Request for Surface Commingling and Off-Lease Measurement
Dugan Production Corp.'s Com No. 1E, Com No. 2 (A-2-29N-14W), Com No. 4 (C-2-29N-14W), Federal I No. 99 (H-3-29N-14W) and Tabor Com No. 90 (H-35-30N-14W)
State Lease Nos. B-11242, E2526, E-6714 & LG-3736
Basin Fruitland Coal and Harper Hill Fruitland Sand-Pictured Cliffs Gas Pools (X)
San Juan County, New Mexico

Dear Mr. Roe:

We are in receipt of your letter of March 29, 2000. In your letter you requested our approval for surface commingling and off-lease storage (X) of production from Dugan's Com No. 4, Federal I No. 99, and Tabor Com No. 90 at the Com No. 1E and 2 wells central delivery sales meter located in the NE/4NE/4 of Sec. 2-29N-14W.

It is our understanding that only natural gas (X) will be commingled after being measured with conventional, continuous recording allocation meters located at each well. The commingled gas stream will then be compressed and delivered to the Com No. 1E CDP sales meter.

Since it appears that all the New Mexico Oil Conservation Division's rules and regulations have been complied with, and there will be no loss of revenue to the State of New Mexico as a result of your proposed operation, your request is hereby approved. Our approval is subject to like approval by the New Mexico Oil Conservation Division and the Bureau of Land Management.

Your \$30.00 dollar filing has been received.

Please contact Ms. Debbie Padilla of our Right-of-Way Division at (505) 827-5729 for a right-of-way through the NE/4NW/4, N/2NE/4 of Section 2-29N-14W. Also, please contact Ms. Zilla Padilla of our Commercial Resources Division at (505) 827-5723 for a possible business lease in the NE/4NE/4 of Section 2-29N-14W. Our approval is contingent upon you acquiring the appropriate surface easements.

- (X) phone conversation 5/1/00 with Pete Martinez e SLC.
- (A) - the SLC is aware that the Basin Dakota is also approved for surface commingling - this letter adds the two listed Pools for prior approval.
- (B) - Pete agrees this should be measurement & he is making note of that - the title is correctly stated & so I did not request amendment.
- (C) - SLC does acknowledge water is also commingled.

Dugan Production Corp.
