Attention: Mr. Hal Porter

Gentlemen:

On March 22, 1965, this office received your application for authorization to convert your Adkins Williams Well No. 7 from producer to water injection. The State Engineer in a letter dated March 31, 1965, directed to Mr. A. L. Porter, Jr., with a carbon copy to you, objected to the conversion unless injection is made through tubing under a packer set well below the top of the cement surrounding the 4- $\frac{1}{2}$  inch casing. How do you plan to resolve this matter? Do you wish to comply with the conditions stated by the State Engineer, withdraw the application, or have the application set for an Examiner Hearing?

Very truly yours,

J. E. KAPTEINA  
Engineer

Attn: Mr. J. E. Kapteina

Dear Mr. Kapteina:

With reference to your letter of May 5, 1965 concerning conversion of Adkins-Williams well No. 7 from producer to injection, we have no objection to the recommendation of the State Engineer, concerning a packer set below the top of the cement. If you are in agreement, please issue an administrative order for the conversion of this well.

Very truly yours,

CIMA CAPITAN, INC.

H. C. Porter
