Re: Injection Pressure Increase
State "BD" No. 2,
Lea County, New Mexico

Dear Sir:

Reference is made to your request of March 17, 1986 to increase the surface injection pressure on your State "BD" No. 2 Well. This request is based on a step rate test conducted on the well on March 12, 1986. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on this well is justified at this time.

You are therefore authorized to increase your surface injection pressure on the following well:

<u>Well & Location</u>	<u>Maximum Injection Surface Pressure</u>
State "BD" No. 2 Section 7, T-17-S, R-33E, Lea County, New Mexico	2050

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or it is endangering any fresh water aquifers.

Sincerely,

A handwritten signature in cursive script, appearing to read "R. L. Stamets", written in dark ink.

R. L. STAMETS
