RETURN RECEIPT REQUESTED

Mr. David R. Catanach, Petroleum Engineer
Oil Conservation Division
Post Office Box 2088
Santa Fe, New Mexico 87501

Re: Request for Approval to Convert Nine (9) Wells to Injection / Expansion of Waterflood; Todd Lower San Andres Unit ("the Todd Unit"); Roosevelt County, New Mexico.

Dear Mr. Catanach:

I have enclosed herewith for your review and approval Murphy Operating Corporation's application dated April 21, 1988 for the conversion to injection of nine (9) wells located in the Todd Lower San Andres Unit referenced above. The utilization of these wells (#29-15, #30-2, #30-6, #30-12, #31-11, #32-7, #35-1, #35-5, #36-1 marked in blue on the map attached hereto) should complete the creation of two sets of line-drive patterns along two preferential permeability trends. This configuration will also begin the expansion of the waterflood injection pattern to 80-acre five spots, where appropriate throughout the unit. The conversion to injection of wells(s) #35-1, #35-5, and #36-1 will allow Murphy Operating Corporation ("MOC") to initiate injection into the "western" portion of the Todd Unit, thereby allowing MOC the opportunity to evaluate this area for the possible existence of any preferential permeability trends prior to the selection of an ultimate injection pattern.

Enclosed with the application is a land plat upon which a 1/2 mile radius circle ("area of review") has been drawn around each injection well. A "typical" schematic diagram with the required downhole information is also included herewith. Certain statements necessary to the completion of application Form C-108 are given below:

REQUIRED INFORMATION: (Presented in same sequence and format as on Form C-108)

- V. Attached as Exhibit I (pages 1-9).
- VI. Attached as "Table of Drilling and Completion Information". Note that the plugged wells within the area(s) of review have schematic diagrams attached).
- VII. 1) Included in tabular form (see VI above).
2) This is a closed system.
3) Included in tabular form (see VI above).
4) Attached, see water analysis and letter dated September, 30 1987 from Permian Treating Chemicals.
5) Not applicable.
- VIII. Geological data and description of "Injection Zone" and "Fresh Water Zones" in area.

Injection Zone: The proposed injection zone is known as the Slaughter P-2 porosity zone of the San Andres Formation. This zone is a tan to brown dolomite. Scattered anhydrite inclusion and bedding occurs along with infrequent zones of fine solution porosity. The top of the P-2 occurs at approximately 4220' below ground level and has an approximate thickness of 40 to 60 feet. This zone dips south and east and as a result the bottom of this zone can occur at depths approaching 4335' below ground level.

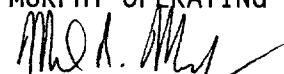

Fresh Water Zone: The only known fresh water source in this area is the Ogallala Formation. This is a fresh water sand that is infrequently present throughout the area. The maximum reported depth is 250 feet below ground level as evidenced in two water wells located approximately 2-1/2 miles east of the Todd Lower San Andres Unit eastern boundary line. If a local presence of the Ogallala exists, it will be protected by the 280 feet or more of 8 5/8" surface casing set in all of the wells in the Todd Lower San Andres Unit.

- IX. All past stimulation programs are listed in tabular form (see VI above).
- X. Wells logs have been previously submitted to the Division.
- XI. There are no producing fresh water wells within one mile of the proposed injection wells.
- XII. Although this requirement is for disposal wells, Murphy Operating Corporation has examined available geologic and engineering data and finds no evidence of open faults or any other hydrologic connection between the proposed disposal (injection) zone and any underground source of drinking water
- XIII. The Proof of Notice requirement has been complied with. Please see the attached Affidavit of Publication and a copy of the certified receipts from the landowner, Ted Williamson, Milnesand, New Mexico and the offsetting leasehold operators within 1/2 mile acknowledging receipt of this application.

Murphy Operating Corporation hereby respectfully requests administrative approval to the application contained herein. Should you have any questions or comments, please contact the undersigned at the telephone number listed above.

Sincerely,

MURPHY OPERATING CORPORATION

Mark B. Murphy
President and Chief Operating Officer

MBM/msl

APPLICATION FOR AUTHORIZATION TO INJECT

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? yes no
- II. Operator: Murphy Operating Corporation
- Address: Post Office Box 2648, Roswell, New Mexico 88202-2648
- Contact party: Mark B. Murphy Phone: 505/623-7210
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? yes no
If yes, give the Division order number authorizing the project #14-08-0001-19582
NMOCD #R-6677
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- * VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- *VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- * X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- * XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification
- I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.
- Name: Mark B. Murphy Title: President/Chief Operating Officer
- Signature: Mark B. Murphy Date: April 21, 1988

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal. Murphy Operating Corporation correspondence dated October 16, 1987

and C-108 Application dated October 9, 1987.

DISTRIBUTION: Original and one copy to Santa Fe with one copy to the appropriate Division district office.

III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leschold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

Subject: Compatibility of fresh and produced waters
from Todd Lower San Andres Unit.

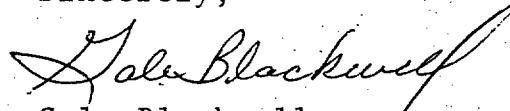

Gentlemen:

We have ran analysis on produced, fresh, and commingled waters from the above mentioned lease (see attached copies.)

We at Permian Treating Chemicals, Inc. feel that these waters injected separately or commingled are very compatible.

If we can be of any further assistance, please call myself or Mr. David Nailon at anytime.

Sincerely,

Gale Blackwell
Permian Treating Chemicals, Inc.

Todd Lower San Andres Unit
 Wells #29-15, #30-2, #30-6, #30-12,
 #31-11, #32-7, #35-1, #35-5, #36-1
 Roosevelt County, New Mexico

Typical Data Sheet

8 5/8" J-55 in 12 1/4" hole.
 Cemente circulated to the surface

Annulus is filled with inert fluid and pressure tested.

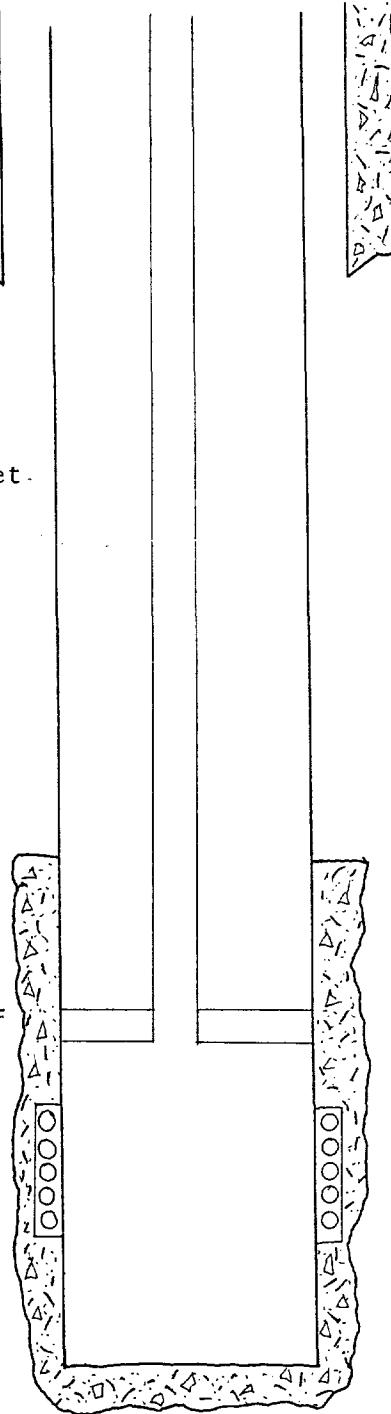

4 1/2" or 5 1/2" Uni-I packer set
 approximately 100' above upper most
 perforation.

2 3/8" 4.7# J-55 ceramic lined and set.
 in all wells except Well #36-1.

2 1/6" 3/25# J-55 ceramic lined and
 set in Well #36-1.

4 1/2" or 5 1/2" 7-7/8" hole. Top of
 cement 500' - 1000' above uppermost
 perforation.

P-2 S.A. Perforations

The proposed injection interval is
 the P-2 zone of the San Andres
 Formation. This well was
 originally drilled as a producer.
 No known commercial oil or gas
 production exists in the next high
 or next lower zone.

LEGAL NOTICE

This shall constitute notice to all the world that Murphy Operating Corporation (United Bank Plaza, Suite 300, Post Office Box 2648, Roswell, New Mexico 88202-2648, Attention Mark B. Murphy, telephone number (505) 623-7210), intends to convert the following wells from producing to injection service for the purpose of expanding the existing waterflood project, the Todd Lower San Andres Unit, located in Roosevelt County, New Mexico.

Well No., Unit, Section, and Township, Range respectively:
29-15, O, 29, T-7-S, R-36-E, NMPM;
30-2, B, 30, T-7-S, R-36-E, NMPM;
30-6, F, 30, T-7-S, R-36-E, NMPM;
30-12, L, 30, T-7-S, R-36-E, NMPM;
31-11, K, 31, T-7-S, R-36-E, NMPM;
32-7, G, 32, T-7-S, R-36-E, NMPM;
36-1, A, 36, T-7-S, R-35-E, NMPM;
35-1, A, 35, T-7-S, R-35-E, NMPM;
35-5, E, 35, T-7-S, R-35-E, NMPM

Water will be injected into the P-2 zone of the San Andres formation (between depths of 4200' to 4350') at rates of approximately 400 BWPD and at maximum wellhead pressures not exceeding 850psi.

Interested parties must file objections or requests for hearing with the Oil Conservation Division, Post Office Box 2088, Santa Fe, New Mexico 87501 within 15 days.

Re: Todd Lower San Andres Unit
Roosevelt County, New Mexico

V

This letter is to constitute notice that Murphy Operating Corporation, Roswell, New Mexico, intends to convert the following wells from producing to injection service for the purpose of expanding the existing waterflood project, the Todd Lower San Andres Unit, located in Township 7 South, Range 36 East, NMPM, Roosevelt County, New Mexico.

<u>Well No.</u>	<u>Unit</u>	<u>Section</u>	<u>Township, Range</u>
29-15	O	29	T-7-S, R-36-E, NMPM
30- 2	B	30	T-7-S, R-36-E, NMPM
30- 6	F	30	T-7-S, R-36-E, NMPM
30-12	L	30	T-7-S, R-36-E, NMPM
31-11	K	31	T-7-S, R-36-E, NMPM
32- 7	G	32	T-7-S, R-36-E, NMPM
36- 1	A	36	T-7-S, R-35-E, NMPM
35- 1	A	35	T-7-S, R-35-E, NMPM
35- 5	E	35	T-7-S, R-35-E, NMPM

Water will be injected into the P-2 zone of the San Andres formation between the depths of 4200' - 4350' at rates of approximately 400 BWPD and at maximum wellhead pressures not exceeding 850psi.

Enclosed for your review and information, please find a copy of the State of New Mexico Oil Conservation Division Form C-108, "Application for Authorization to Inject".

If you should have any questions concerning this matter, I can be contacted at the telephone number listed above. Interested parties must file objections or requests for hearing with the Oil Conservation Division, Post Office Box 2088, Santa Fe, New Mexico 87501 within fifteen (15) days.

Sincerely,

MURPHY OPERATING CORPORATION

Mark B. Murphy
President and Chief Operating Officer
