

February 7, 1989

Ref: Application for conversion
of the WPQU #169 from producing
oil well to water injection well,
NMOCD Form C-108 Section XII.

I hereby state that I have evaluated information derived from logs, well files and other available geologic and engineering data, concerning this wellbore and other wellbores in the area of interest. I have found no evidence of open faults or any other hydrologic connection between the water injection zones in the Queen formation and any underground source of drinking water.

ARMSTRONG ENERGY CORPORATION

Thomas K. Scroggin
