

APPLICATION FOR AUTHORIZATION TO INJECT

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? yes no
- II. Operator: Siete Oil and Gas Corporation
- Address: P.O. Box 2523 Roswell, NM 88202-2523
- Contact party: Robert Lee Phone: 505-622-2202
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? yes no R-8657
If yes, give the Division order number authorizing the project R-8657.
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- * VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- *VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- * X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- * XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification
- I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.
- Name: Robert Lee Title Senior Reservoir Engineer
Signature: Robert Lee Date: October 6, 1989

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal. This data was previously submitted for the Blackhawk waterflood project, order # R-8657, which was approved May 19, 1988.

DISTRIBUTION: Original and one copy to Santa Fe with one copy to the appropriate Division

III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

Attention: Mr. Dave Catanach

Re: Request for Administrative Approval
for Expansion of Waterflood Project
#R-8657

Dear Mr. Catanach:

Please find attached Form C-108 requesting approval to expand the Blackhawk Waterflood, which was granted under Order #R-8657. If all attachments are satisfactory and no offset Working Interest Owners object, Siete respectfully requests approval be granted administratively.

Siete plans to drill the Blackhawk #7 as an injection well to support the Blackhawk #1. The #1 is currently experiencing severe production decline and water breakthrough. This is because it is being supported by one injection well, the Blackhawk #3. By drilling the #7 we will support the #1 from the other direction and recover reserves that would otherwise be unrecoverable. The Blackhawk #6 conversion is not planned for the immediate future. We would like to have approval so we can perform this work at our convenience. The #6 will provide support for the Blackhawk #5. We will do this work when the #5 begins to see a significant water cut.

If you have any questions, or if I can be of any assistance, please do not hesitate to call me at (505) 622-2202.

Sincerely,

SIETE OIL AND GAS CORPORATION

Robert S. Lee

Robert S. Lee
Senior Reservoir Engineer

SIETE OIL & GAS CORPORATION

Blackhawk Federal No. 6 - Conversion to Injection

NMOCD Form C-108 Section III

III. Data on injection well (s)

A. Injection well information (see attached schematic)

Tabular Data

1. Lease: Blackhawk Federal

Well No.: 6

Location: 2310' FSL & 1650' FEL
Section 23: T-18-S, R-31-E
Eddy County, New Mexico

2. Proposed Casing: 8 5/8" surface @ 350' w/225 sks.,
circ. to surface
5 1/2" production @ 4499' w/800
sk. circ. to surface.

3. Injection tubing: + or - 118 jts. 2 3/8", 4.7
lb/ft., J-55 internally plastic
coated tubing.

4. Packer: Baker Model AD-1 injection packer set @
3670 feet.

B. Other well information

1. Injection formation: Yates-7 Rivers-Queen-Penrose-
Grayburg-San Andres

Field: Shugart Yates 7-Rvrs Queen Grayburg San Andres

2. Cased hole perforated interval is estimated to be
from 3700' - 3720' (Penrose), 4214' - 4229'
(Grayburg).

3. The Blackhawk Federal No. 6 well was originally
drilled as an oil well.

4. Within the area of the Blackhawk Federal No. 6, there
are no other higher productive formations. The
Delaware is productive at a depth of 5300'. But this
well did not penetrate the Delaware.

Blackhawk Federal No. 7 - Proposed Injection Well to Be Drilled

NMOCD Form C-108 Section III

III. Data on injection well (s)

A. Injection well information (see attached schematic)

Tabular Data

1. Lease: Blackhawk Federal
- Well No.: 7
- Location: 2650' FSL & 2310' FWL
Section 24: T-18-S, R-31-E
Eddy County, New Mexico
2. Proposed Casing: 8 5/8" surface @ 358' w/230 sks.,
circ. to surface
5 1/2" production @ 4500' w/1050
sk. circ. to surface.
3. Injection tubing: + or - 118 jts. 2 3/8", 4.7
lb/ft., J-55 internally plastic
coated tubing.
4. Packer: Baker Model AD-1 injection packer set @
3670 feet.

B. Other well information

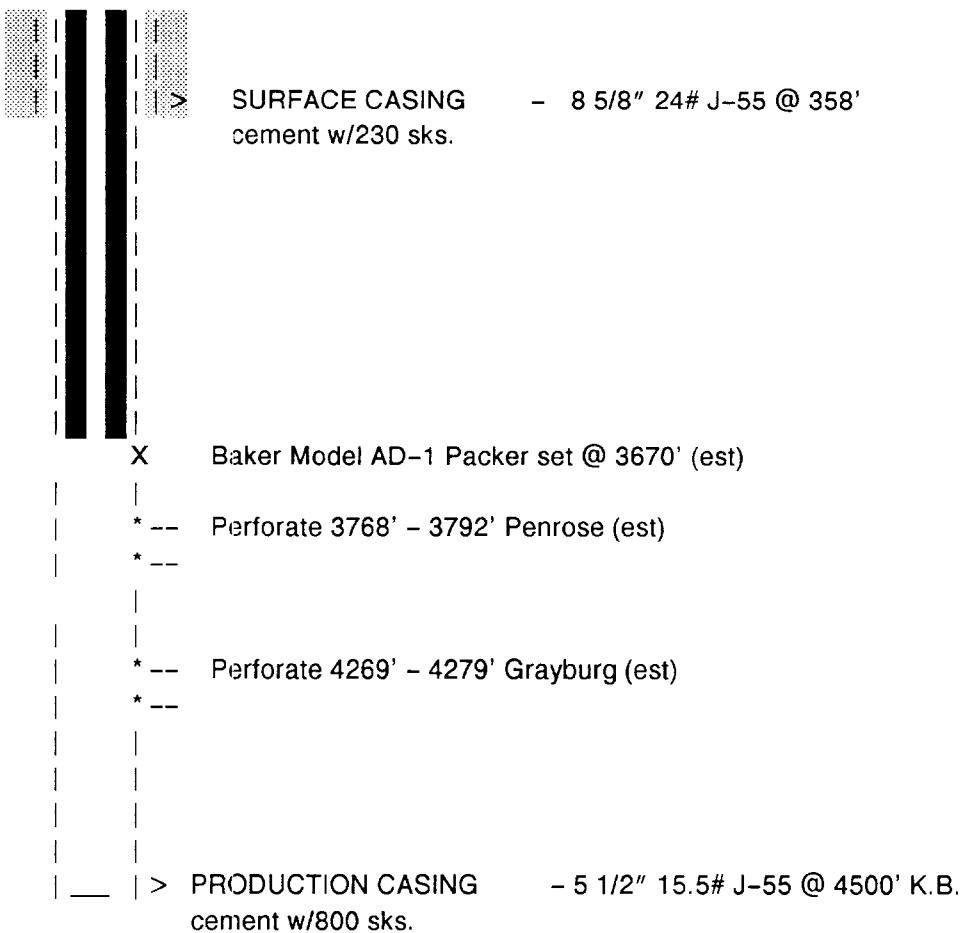

1. Injection formation: Yates-7 Rivers-Queen-Penrose-
Grayburg-San Andres

Field: Shugart Yates 7-Rvrs Queen Grayburg San Andres
2. Cased hole perforated interval is estimated to be
from 3768' - 3792' (Penrose), 4269' - 4279'
(Grayburg).
3. The Blackhawk Federal No. 7 well will be drilled as
a water injection well.
4. Within the area of the Blackhawk Federal No. 7, there
are no other higher productive formations. The
Delaware is productive at a depth of 5300'. But this
well will not penetrate the Delaware.

SIETE OIL GAS CORPORATION

Blackhawk Waterflood Project

NMOCD Form C-108 Section VII

VII. Injection Data

1. Injection Rates

- a. Proposed average daily water injection is 300 BWPD/Well.
- b. Maximum rate of daily water injection is 500 BWPD/Well.

2. The injection station for the gathering and processing injection water will be a closed system.

3. Injection Pressures

- a. Proposed average daily injection pressure is 600 PSI.
- b. Maximum daily injection pressure is 740 PSI*.

* Note: Maximum injection pressure abides by .2 PSI/Ft maximum injection pressure imposed by the NMOCD. Future necessary increases in surface pressure will be obtained administratively from the NMOCD using field obtained "Step Rate Test" data.

4. Chemical analysis of injection and formation water (see attached Nalco water analysis).

- a. Proposed injection fluid will be produced water from offsetting Siete operated leases which currently produce from both the East Shugart Delaware and Shugart Grayburg formations. These leases are the Geronimo Federal lease (E/2 Sec. 24, T-18S, R31E), Arco Federal Lease (NE/4 NW/4 and SW/4 NW/4 Section 24, T-18S, R-31E), and Blackhawk Federal lease (NE/4 NE/4 Section 23, T-18S, R-31E) in Eddy County, New Mexico, and the Conoco Federal lease (SW/4 SW/4 Section 18, T-18S, R32E), Inca Federal lease (N/2 and SW/4 NW/4 Section 19, T-18S, R32E), Jade Federal lease (SE/4 NW/4 Section 19, T-18S, R32E) and Mohawk Federal lease (NE/4 SW/4 Section 19, T18S, R32E) in Lea County, New Mexico.

- b. A sample of formation water was obtained from a nearby Siete operated Queen-Penrose producing well, the Scottsdale Federal No. 1 in the NW/4 NE/4 Section 27, T18S, R31E in Eddy County, New Mexico. This well is approximately 2 miles west of the proposed unit.

5. Water injection will be into a zone currently productive of oil and gas.

- IX. The Penrose and Grayburg zones will be acidized with 2000 gallons of acid and fraced with 40,000 gallons and 80,000 lbs. 12/20 sand.
- X. Well logs will be submitted once the well has been drilled and logged.
- XI. There are no fresh water sources within one mile of the proposed injection well.
- XII. I, Robert Lee, a Production/Reservoir Engineer for Siete Oil and Gas Corporation and in behalf of, have compiled and examined all available geologic and engineering data and have not found any evidence of hydrologic connections between the proposed Shugart Penrose-Grayburg Waterflood Project injection zone and any sources of underground drinking water.
- XIII. Proof of Notice - requirements
 - 1. See attached mailing list and registered mail certificates.

October 16, 1989
This is to advise all parties concerned, Siete Oil and Gas Corporation intends to convert the following wells to Salt Water injection wells:
Geronimo Federal, #2
950' FNL & 2310' FEL
Section 24, T-18-S, R-31-E
Eddy County, New Mexico

Geronimo Federal #7
1750' FNL & 990' FEL
Section 24, T-18-S, R-31-E
Eddy County, New Mexico

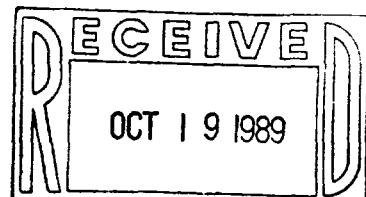

Inca Federal #4
760' FNL & 420' FWL
Section 19, T-18-S, R-32-E
Lea County, New Mexico

Blackhawk Federal #6
2310' FSL & 1850' FEL
Section 23, T-18-S, R-31-E
Eddy County, New Mexico
and drill and injection well:
Blackhawk Federal #7
2650' FSL & 2310' FWL
Section 24, T-18-S, R-31-E

Eddy County, New Mexico
The formations to be injected into are the Perroso at an approximate depth of 3800' and the Grayburg at an approximate depth of 4300'. The maximum expected injection rate is 300 BWPD per well at a maximum injection pressure of 744 psi. Questions can be addressed to:

Re: Request for Administrative Approval
for Expansion of Waterflood Project
#R-8657.

Dear Mr. Catanach:

Please find attached the construction information for wells within the area of review for our proposed injection wells. I apologize for any inconvenience this may have caused for you. I appreciate your assistance in this matter.

If you have any questions, or if I can be of any assistance please do not hesitate to call me at (505) 622-2202.

Sincerely,

Robert Lee
Senior Reservoir Engineer
