Re: Southland Royalty Company
RJU Tr. 2A Well No. 2
Unit B, Sec 27, T17S, R29E
Eddy County, New Mexico
LC-028775-B

Gentlemen:

Enclosed is Form C-108 and attachments requesting authorization to convert the above referenced well to water injection for secondary recovery. Proof that a copy of the application has been sent to operators within $\frac{1}{2}$ mile and the required legal notice has been published in a local newspaper will be sent following receipt of that information.

By copy of this packet, we are requesting the appropriate BLM representative to review this data and to advise you of their concurrence with our request. If either of you have questions please contact me at 915 688-6836.

Sincerely,

Robert L. Bradshaw
Sr. Staff Environmental Representative

cc: Well file
Joe Small
OCD - Artesia
BLM - Carlsbad

APPLICATION FOR AUTHORIZATION TO INJECT

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? Yes No
- II. Operator: Southland Royalty Company
Address: 3300 N. "A" St., Bldg. 6 Midland, Texas 79705
Contact party: Robert L. Bradshaw Phone: (915) 688-6836
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? yes no
If yes, give the Division order number authorizing the project _____.
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- * VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- *VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any. None planned
- * X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- * XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken. No fresh water wells.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Robert L. Bradshaw Title Senior Staff Environmental Rep.

Signature: Robert L. Bradshaw Date: December 20, 1991

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal.

III. WELL DATA

- A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:
- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
 - (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
 - (3) A description of the tubing to be used including its size, lining material, and setting depth.
 - (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

- B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.
- (1) The name of the injection formation and, if applicable, the field or pool name.
 - (2) The injection interval and whether it is perforated or open-hole.
 - (3) State if the well was drilled for injection or, if not, the original purpose of the well.
 - (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
 - (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

(or describe any other casing-tubing seal).

Other Data

1. Name of the injection formation San Andres (Keely)
2. Name of Field or Pool (if applicable) ABG Jackson 7RV QN GB SA Field
3. Is this a new well drilled for injection? Yes No
If no, for what purpose was the well originally drilled? Oil producer from 1937
to present
4. Has the well ever been perforated in any other zone(s)? List all such perforated intervals and give plugging detail (acks of cement or bridge plug(s) used) originally open hole from 2266-2805'. Deepened to 3300'. Ran 5-1/2" casing to surface and cemented with 100 sxs.
5. Give the depth to and name of any overlying and/or underlying oil bearing zones (pools) in this area. No other producing formations below Metex (Grayburg) could be productive above at 2300-2400'.

Attachment to Form C-108
Southland Royalty Company
Robinson Jackson Unit Tract 2A, No. 2

VII.

1. Average rate/volume 500 bpd
Maximum rate/volume 1000 bpd
2. This is a closed system.
3. Average injection pressure 1600 psi.
Maximum injection pressure 2000 psi.
4. Formation water will be reinjected.
5. Formation water will be reinjected for secondary recovery.

VIII. San Andres (Keely Zone) of Permian Age.

Lithology - dolomite with some anhydrite

Thickness: San Andres - (2700 - 3600') - 900'
Keely Zone - (3200 - 3400') - 200'

No underground drinking water in the area.

IX. No stimulation planned.

X. Log attached.

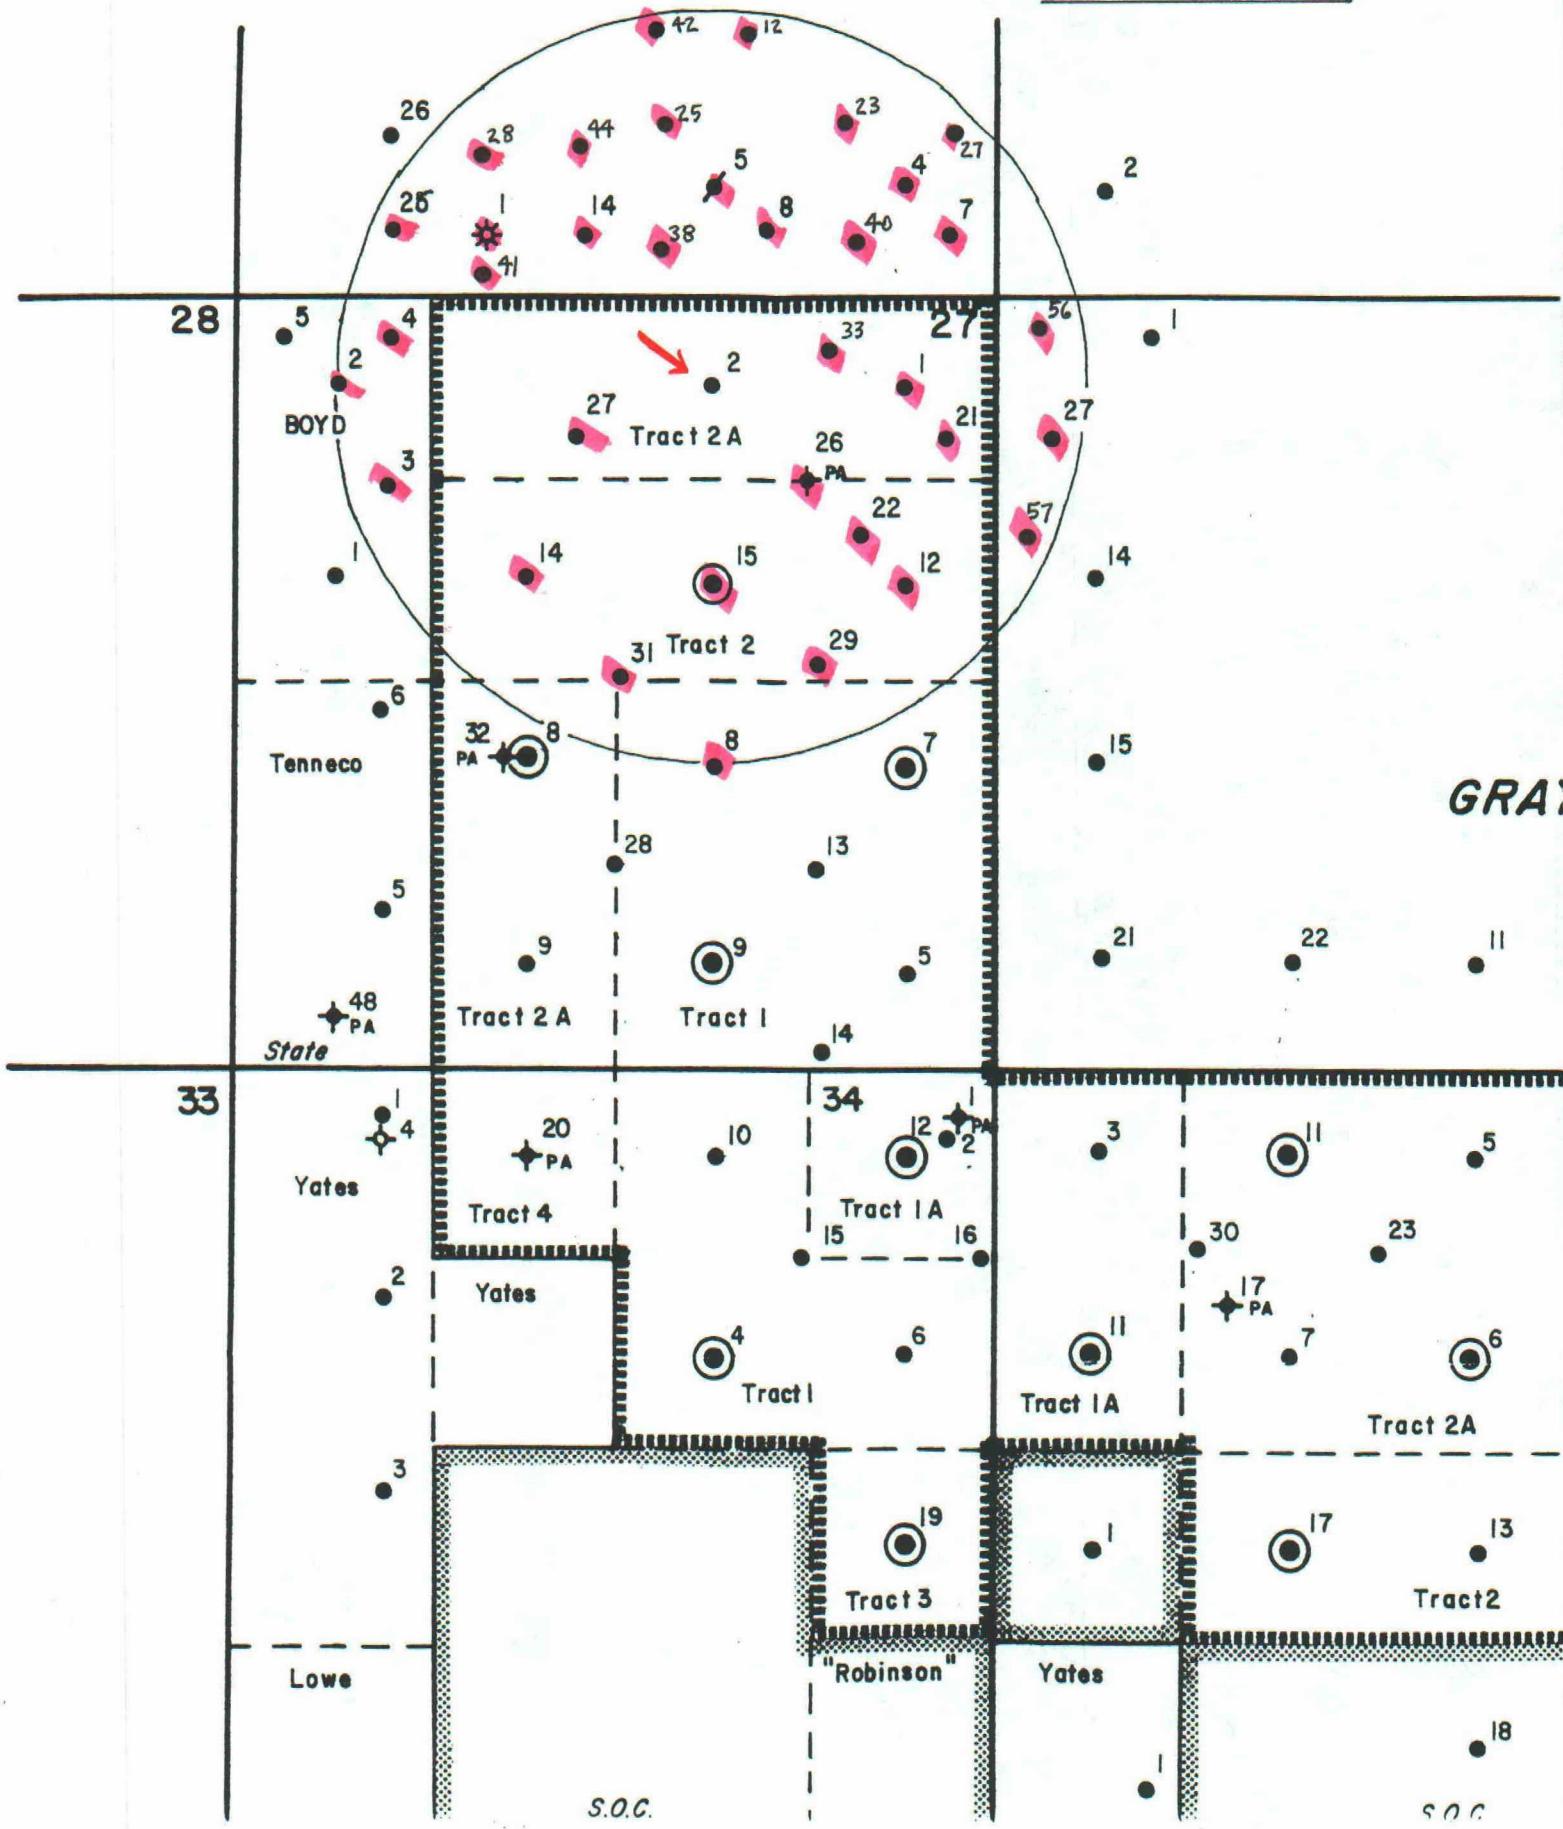

XI. No fresh water wells within 1 mile.

XII. This application is not for a disposal well.

Gentlemen:

Form C-108 and attachments requesting authorization to convert the above referenced well to water injection for secondary recovery were sent to you on December 20, 1991. Attached is proof that a copy of the application has been sent to operators within $\frac{1}{2}$ mile and the required legal notice has been published in a local newspaper.

If other information is needed prior to your approval of our request, please contact me at (915) 688-6836.

Sincerely,

Robert L. Bradshaw
Sr. Staff Environmental Representative

Fourth Publication _____

Subscribed and sworn to before me this 6th day
of January 1992

Notary Public, Eddy County, New Mexico

My Commission expires September 23, 1996

Copy of Publication

LEGAL NOTICE

Southland Royalty proposes to convert the RJU Tr. 2A, R. 2 to water injection for secondary recovery of oil. The well is located 660' FNL and 1980' FEL, Section 27, T17S, R29E in Eddy County, New Mexico. Injection is proposed into the San Andres at 3236' FNL at a maximum rate of 1000 BPD and a maximum pressure of 2000 psi.

Interested parties must file objections or requests for hearing with the Oil Conservation Division, P.O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

Published in the Artesia Daily Press, Artesia, New Mexico, December 26, 1991.
