***RE: Injection Pressure Increases:
C.A. Russell, Hudson Federal, Turner 'A',
Turner 'B' and Friess Fren Waterflood Projects,
Eddy County, New Mexico.***

Dear Mr. Jackson:

Reference is made to your request dated November 6, 1997 to increase the surface injection pressure on fifty-one wells in the above referenced projects. This request is based on step rate test data as well as additional inferred reservoir pressure data on these wells. The combined data have been reviewed by my staff and we feel an increase in injection pressures on these wells is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following wells:

**TBD (To be determined) by top perforation depth times pressure gradient indicated.*

All wells located in Township 17 South, Range 31 East, Eddy County, New Mexico.

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

Lori Wrotenbery
Director
