APPLICATION FOR AUTHORIZATION TO INJECT

- I. Purpose:  Secondary Recovery  Pressure Maintenance  Disposal  Storage  
Application qualifies for administrative approval?  yes  no
- II. Operator: Pennzoil Exploration & Production Co.  
Address: PO Box 50090 Midland, Texas 79710-0090  
Contact party: Sharon Hindman Phone: (915) 686-3505
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project?  yes  no  
If yes, give the Division order number authorizing the project \_\_\_\_\_
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
  2. Whether the system is open or closed;
  3. Proposed average and maximum injection pressure;
  4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
  5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification
- I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.
- Name: Ann E. Ritchie Title Regulatory Agent  
Signature: [Signature] Date: 9-22-97
- XV. If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal.

**III. WELL DATA**

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

**XIV. PROOF OF NOTICE**

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

**NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.**

---

**NOTICE:** Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

Re: Application for Authorization to Inject  
Atoka San Andres Unit, Well Nos. 120, 132, and 136  
Atoka (San Andres) Field  
Eddy County, New Mexico

Gentlemen:

As we discussed in our telephone conversation on July 31, 1997, Pennzoil Exploration & Production Company intends to request permission to convert the Atoka San Andres Unit (ASAU) Well Nos. 120, 132, and 136 to water injection wells. Pennzoil is currently injecting water into 17 water injection wells at the ASAU. The shallowest perforation in these 17 injection wells is at 1430', and the deepest perforation is at 1833'. The surface injection pressures for these wells range from 850 to 950 psig. Pennzoil is currently evaluating the productivity of uphole San Andres zones that are within the unitized interval of the ASAU. In the event that these uphole intervals are oil bearing, Pennzoil plans to perforate these zones in the offset water injection wells. If uphole perforations are added in the ASAU Well Nos. 120, 132, and 136, Pennzoil will perform step rate tests on these wells to determine the parting pressure of the uphole San Andres zones and will request an amendment to the injection permits. However, if uphole perforations are not added, Pennzoil requests that a permit be granted to inject into the existing perforations in the ASAU Well Nos. 120, 132, and 136. Thank you for your consideration. If you have any questions or comments, please contact me at (915) 686-3524.

Sincerely yours,

*Jack T. Lowder*

Fracture Treatment & P&A

FIELD: Atoka San Andres

FORMATION: San Andres

LOCATION: 1650' FNL & 990' FWL of Section 14,  
T-18-S, R-26-E, Eddy County, New Mexico.

ELEVATION: 3321' G.R.

PERFORATIONS: 1645'-1653' - 4 shots per foot.

LAST TREATMENT PRIOR  
TO CURRENT WO: 10-8-72 - Squeeze cement casing and 500 Gals.  
15% acid.

PRODUCTION PRIOR  
TO CURRENT WO: 0 oil and 1 BHPD.

8-05-74 Moved in Loyd Well Service and pulled rods and tubing. Spotted 200 gallons 15% acid on formation through tubing after pulling rods and pump. Shut down for night.

8-06-74 Rigged up Testers Inc. and blew up Baker Model A Tension Packer at 4700#. Split 3 out of 4 joints of 2-7/8" tubing at 2200 to 2700#. Shut down waiting on 3" frac tubing.

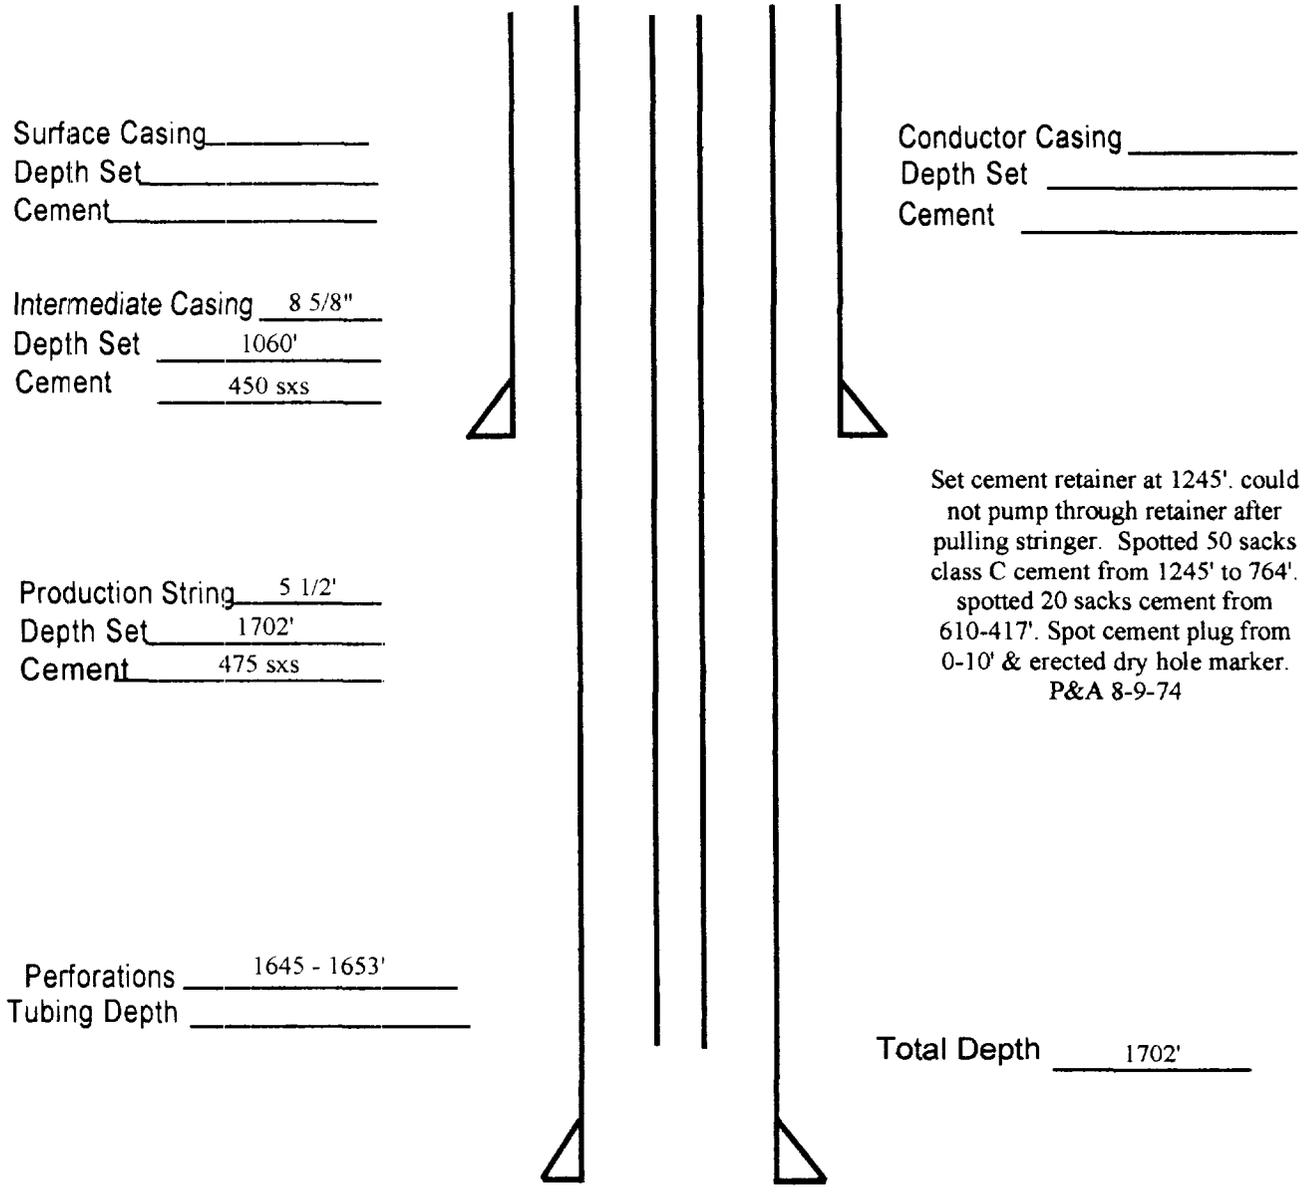

8-07-74 Ran 5-1/2" x 2" x 2-1/2" Guiberson Shorty Tension Packer on 3-1/2" EUE 8 Rd. Tubing and set at 1479' with 12 points tension. Fraced with 40,000 Gals. gelled water, 35,000# 20-40 sand and 5000# 10-20 sand, 400# J-2, 20 Gals. aquaflo, Average Press. 3700#, Maximum Press. 3900# and Minimum Press. 3450#. Average Injection Rate 36 BPM. ISDP 1050#, 10 minute SI 900#. Total load to recover 986 Bbls.

8-08-74 Tied well into frac tank and flowed 170 Bbls. sulphur water in 13 minutes. 900 BPH rate with small stream running out of casing. Hooked up Halliburton and pumped 300 sacks Class C cement with 2% Calcium Chloride down tubing into formation. Displaced cement out of tubing. Had small leak in tubing and let cement come back in tubing 2 joints. Shut down for night.

8-09-74 Ran sinker bar and depthometer in tubing and found cement in tubing. Unset packer and pulled and laid down 3" tubing. Picked up 2" tubing and ran 5-1/2" S.V. E-Z drill packer and set @ 1250'. Pumped into casing between packer and cement plug @ rate of 4 BPM @ 900#. Pulled stinger out of packer and could not get stinger into retainer far enough to open. Spotted 50 sacks Class C on top of retainer and 20 sacks Class C @ 600'. Preparing to clear location and install abandoned well marker.

INSTRUCTIONS

This form is to be filed with the appropriate District Office of the Commission not later than 30 days after the completion of any newly-drilled or deepened well. It shall be accompanied by one copy of all electrical and radio-activity logs run on the well and a summary of all special tests conducted, including drill stem tests. All depths reported shall be measured depths. In the case of directionally drilled wells, true vertical depths shall also be reported. For multiple completions, Items 30 through 34 shall be reported for each zone. The form is to be filed in quintuplicate except on state land, where six copies are required. See Rule 1106.
