RE: Injection Pressure Increase,
Southeast Maljamar Grayburg San Andres Unit,
Lea County, New Mexico

Dear Mr. Safargar:

Reference is made to your request dated June 4, 1999 to increase the surface injection pressure on one well in the above referenced waterflood unit. This request is based on a step rate test conducted on May 18, 1999. The results of the test have been reviewed by my staff and we feel an increase in injection pressure is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well:

Table with 2 columns: Well and Location, Maximum Surface Injection Pressure. Row 1: Southeast Maljamar Grayburg San Andres Unit Well No.614 Unit Letter N, Section 29, Township 17 South, Range 33 East, 2700 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

Handwritten signature of Lori Wrotenbery
