Mr. A. L. Porter, Secretary-Director
New Mexico Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico 87501

Dear Sir:

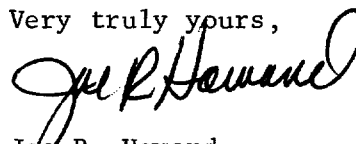

In accordance with Rule 11 of Commission Order No. R-3229 of May 3, 1967, which authorizes Coastal's operation of a pressure maintenance project in its Flying "M" (San Andres) Unit Area, Flying "M" (San Andres) Pool, Lea County, New Mexico, Coastal States hereby requests permission to convert the below listed previously producing oil wells to water injection wells:

1. Flying "M" (San Andres) Unit Tract 13 Well No. 3 - located in Unit H, 1978.7' FNL and 663.3' FEL, Section 20, Township 9 South, Range 33 East.
2. Flying "M" (San Andres) Unit Tract 16 Well No. 4 - located in Unit H, 1904.3' FNL and 845.9' FEL, Section 21, Township 9 South, Range 33 East.

As required by Paragraphs (1) and (2) of Rule 11, we are attaching a location plat, which shows the location of above proposed injection wells and all wells within the project area, and a schematic drawing which describes the downhole completion and injection intervals for each well. Also enclosed for your information is a copy of our letter to the offset operators by which they were furnished a copy of this application with Form C-103, "Notice of Intention to Convert to Injection," as evidence of notification to them of the planned conversion projects.

If this application for conversion of these wells to injection is in order, we will appreciate your advising your approval of the projects and returning approved copies of attached Forms C-103 for our records as soon as possible. If you will need any additional information or further data, please let me know.

Very truly yours,

Joe R. Howard
Division Production Superintendent
