As required by Paragraphs (1) and (2) of Rule 11, we are attaching a location plat, which shows the location of above proposed injection wells and all wells within the project area, and a schematic drawing which describes the downhole completion and injection intervals for each well.

If this application for conversion of these wells to injection is in order, we will appreciate your advising your approval of the projects as soon as possible. If you will need any additional information or further data, please let me know.

Very truly yours,
