

APPLICATION OF PHILLIPS PETROLEUM CO.,  
TO EXPAND ITS WATER FLOOD PROJECT IN  
THE VACUUM GRAYBURG-SAN ANDRES POOL  
IN LEA COUNTY, NEW MEXICO.

ORDER PMX NO. 79

ADMINISTRATIVE ORDER  
OF THE OIL CONSERVATION DIVISION

Under the provisions of Order No. R-5897, Phillips Petroleum Company has made application to the Division of January 28, 1980, for permission to expand its East Vacuum Unit Pressure Maintenance Project in the Vacuum Grayburg San Andres Pool in Lea County, N. Mex.

NOW, on this 5th day of February, 1980, the Division Director finds:

1. That application has been filed in due form.
2. That satisfactory information has been provided that all offset operators have been duly notified of the application.
3. That the proposed injection well is eligible for conversion to water injection under the terms of Order No. R-5897.
4. That the proposed expansion of the above referenced pressure maintenance project will not cause waste nor impair correlative rights.
5. That the application should be approved.

IT IS THEREFORE ORDERED:

That the applicant, Phillips Petroleum Co., be and the same is hereby authorized to inject water into the San Andres formations through plastic-lined tubing set in a packer at approximately 4375 feet in the following described well for purposes of pressure maintenance, to wit:

East Vacuum Unit, Tract 2717, Well No. 005 in Unit P of Section 27, Township 17 South, Range 35 East, NMPM, Lea County, New Mexico, and through plastic lined tubing set in a packer at 4365' for purposes of pressure maintenance to wit:

East Vacuum Unit, Tract 3202, Well No. 009 in Unit O of Section 32, Township 17 South, Range 35 East, NMPM, Lea County, New Mexico.

IT IS FURTHER ORDERED:

That the operator shall take all steps necessary to ensure that the injected water enters only the proposed injection interval and is not permitted to escape to other formations or onto the surface.

That the casing-tubing annulus shall be loaded with an inert fluid and equipped with a pressure gauge at the surface or left open to the atmosphere to facilitate detection of leakage in the casing, tubing, or packer.

That the injection well or system shall be equipped with a pop-off valve or device which will limit the wellhead pressure to a maximum of 875 pounds per square inch; provided however that the Division Director may administratively authorize a pressure limitation in excess of the above upon the operator's establishing that such higher pressure will not result in fracturing of confining

That the operator shall notify the supervisor of the Division's Hobbs District Office before injection is commenced through said well;

That the operator shall immediately notify the Supervisor of the Division's Hobbs District Office of the failure of the tubing, casing, or packer in said well or the leakage of water from or around said well and shall take such steps as may be timely or necessary to correct such failure or leakage.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
