Attention: David L. Wacker

RE: *Injection Pressure Increase  
MCA Unit Well Nos. 202 & 350  
Lea County, New Mexico*

Dear Mr. Wacker:

Reference is made to your request dated December 29, 1989, to increase the surface injection pressure on two wells within the Maljamar (MCA) Unit Pressure Maintenance Project. This request is based on step rate tests conducted on these wells on December 11, 1989. The results of the tests have been reviewed by my staff and we feel an increase in injection pressure on these wells is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following wells.

<u>WELL AND LOCATION</u>	<u>MAXIMUM INJECTION SURFACE PRESSURE</u>
MCA Unit Well No. 202 660' FSL & FWL (Unit M) Section 26; and	1850 PSIG
MCA Unit Well No. 350 2615' FSL & 1295' FWL (Unit L),	1355 PSIG

Both in Township 17 South, Range 32 East, NMPM, Lea County, New Mexico.

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

William J. LeMay  
Director
