State of New Mexico
Energy and Minerals Department
Oil Conservation Division
State Land Office Building
P.O. Box 2088
Santa Fe, New Mexico 87501

Dear Sirs:

Elk Energy Corporation respectfully submits applications for Authorization to Inject on the McCallister Lease in Lea County, New Mexico. Much of the data required has undoubtedly been previously submitted for EMD Order R-4026 that gave authority to inject into the McCallister A #2 and #3 wells. We believe all of the additional data required is contained herein.

Sincerely yours,

David Rosen
Certified Petroleum Geologist

APPLICATION FOR AUTHORIZATION TO INJECT

- I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? Yes no
- II. Operator: ELK ENERGY CORPORATION
Address: 1625 LARIMER ST. Suite 2403, Denver, Co. 80202
Contact party: David Rosen or Craig Camozzi Phone: 915-561-8939 or 303892-8934
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? yes no
If yes, give the Division order number authorizing the project R- 4026.
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- * VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- *VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- * X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- * XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: David Rosen Title Vice President - Geology
Signature: David Rosen Date: 9/24/90

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal. R-4026 in 1970 and/or Admin. ORDER SWD #199 (12/77)

III. WELL DATA

- A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:
- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
 - (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
 - (3) A description of the tubing to be used including its size, lining material, and setting depth.
 - (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

- B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

To: NMEMD, OCD
From: Elk Energy Corporation
Subject: Application for Authority to Inject for McCallister
#3, 5, 8
Date: 9/26/90

Part III Attached

Part V Attached

Part VI Attached (Plugging data on McCallister A #1 and #4
submitted previously for R-4026)

Part VII

1. Proposed daily rate of injection 3000 BWPD average,
4000 BWPD maximum for each well
2. System will be closed
3. Proposed average pressure is 500 PSI, maximum
pressure 1000 PSI.
4. Does not apply
5. Does not apply

Part VIII

Previously submitted when McCallister #2 and #3 were
permitted for injection. Wells were last permitted under
Division Order R-4026 June 20, 1978.

Part IX

Wells will be acidized with 2000 gallons of 15% Acid.

levolent and outrageous." He also said supervisors were well aware of the harassment but did not stop it.

The penalty for all of this amounted to a \$2,763 check from West Bend to Zabkowicz — back pay for her two-month medical leave. There was no legal avenue to pursue damages for pain, suffering or medical and psychiatric bills, leaving Zabkowicz with what she considered a hollow victory.

"It just seems outrageous that in 1990 this stuff still goes on," Zabkowicz said. "Punitive and compensatory damages would be a strong deterrent to make certain that this does not happen."

Gary Mason, a cooler repairman at a Coca-Cola bottling plant in Lenexa, Kan., is black and therefore eligible to file for such damages under current law. But he was unable to pursue them due to the new Supreme Court restrictions on workplace protection.

"I was the first black repairman ever hired in the position I had in the cooler department," recalled Mason, 35. "Naturally I started experiencing a lot of racial slurs and remarks and jokes. I was denied promotions, reprimanded for things that I didn't do. From day one, it was a bad atmosphere. The boss didn't even shake my hand."

A federal judge said Coca-Cola officials "apparently admit" that Mason's co-workers told racial jokes and used racial epithets in his presence. But he said the Supreme Court had foreclosed the possibility of damages.

Mason had been seeking income from lost promotions, and for stomach problems a doctor told him were stress-related. "It might have been \$200,000 altogether," he said. Meanwhile, according to Mason, the harassment continues. "I've been reprimanded for serving on jury duty," he said.

Both Mason and Zabkowicz say they would never have gone to court if supervisors and company officials had responded to their repeated complaints.

"These things occur on their premises and they turn their back to it. That's when people are forced into the position to do something about it," Zabkowicz said. "Thank goodness we do have

LEGAL NOTICE

September 19, 1990

Elk Energy Corporation hereby gives public notice that it intends to inject produced saltwater from the Scarborough Yates Seven Rivers Field into the McCallister #3, 5, and #8 wells. These wells are in section 24 and 25, T-26 S, R-36 E Lea County, New Mexico. Injection will be into the Yates and Seven Rivers Formations between 3030' and 3360'. Maximum rate will be 4000 BWPD per well and maximum pressure will be 1000 PSI. Further information can be obtained from Elk Energy Corporation, 1625 Larimer St., Suite 2403, Denver, Colorado, 80202, Attn: Mr. C. Camozzi. Phone 303 892-8934. Interested parties must file objections or requests for hearings within 15 days with the Oil Conservation Division, P.O. Box 2088, Santa Fe, New Mexico 87501.
