Re: O'Brien D Well No. 1-D,
Section 12, T9S, R28E
Twin Lakes Pressure
Maintenance Project ✓
Order No. R-5140

Gentlemen:

As monthly project reports indicate that the subject well in the referenced project is the only remaining active injection well therein and as the well appears to be utilized for the disposal of produced waters only, we would propose to administratively reclassify the same as a salt water disposal well.

This change would require that you submit monthly injection volumes on Form C-120-A rather than the more extensive pressure maintenance report now being submitted.

Please signify your approval of this change by signing and returning the extra copy of this letter enclosed. No other action on your part will be required.

Very truly yours,

R. L. STAMETS
Technical Support Chief
