Re: State "NC" Well No.1  
Unit A, Section 3, T-16S, R-32E,  
Lea County, New Mexico

Dear Mr. Warren

In an effort to update our records concerning the State "NC" Well No. 1, the Division is requesting that you supply the following described information:

A description and analysis of the fluid being injected into the commercially operated State "NC" Well No. 1. This includes an analysis of each and every water source and a description of its point of origin (i.e. San Andres produced water from the Grayburg-Jackson Pool). In addition, this includes water delivered to the well by pipeline and truck.

Division and Federal UIC Rules and Regulations require that all operators of disposal wells provide source water analysis at reasonable frequency. Our information indicates that the State "NC" Well No. 1 was permitted by Petrus Oil Company, L.P. in July, 1987, and that our files have not been updated since that time.

Please provide the information requested within 60-days from the date of this letter. If you need additional time, or you wish to discuss the matter further, please contact Mr. David Catanach at (505) 827-8184.

Failure to comply may result in the imposition of fines and/or the termination of injection authority.

Sincerely,

A handwritten signature in black ink, appearing to read 'William J. LeMay', is written over the typed name. The signature is fluid and cursive, with a long, sweeping tail that extends downwards and to the right.

William J. LeMay  
Division Director
