E.E. Elliott SWD No. 1
UIC Permit Modification
Order No. SWD-376
San Juan County, New Mexico

Amoco desires to relocate the proposed E.E. Elliott SWD No. 1 from the original permitted location of 1220' FNL and 1520' FEL in Section 27, T30N, R9W to 1270' FNL and 580' FWL in Section 26, T30N, R9W in San Juan County, New Mexico. In addition Amoco also requests authorization to modify the original casing design. The original injection well data sheet showed a 9 5/8 inch liner from 2700 to 5500 feet. Amoco now plans to run an intermediate string of 9 5/8 inch casing from surface to 5400 feet instead of the liner. The additional casing will serve to further protect all potential USDW's and facilitate drilling.

The E.E. Elliott SWD was the subject of a UIC permit application filed with the Oil Conservation Division on August 4, 1989 and approved by Administrative Order No. SWD-376 on September 7, 1989. The proposed location has been moved as ordered by the Bureau of Land Management due to an archeological site. The new location eliminates this obstacle but places the well 2100 feet east of the original permitted location. Our review of the ownership does not identify any new parties to those noticed in the initial disposal permit application or the required renote within 1/2 mile of the proposed new location. We are however supplying those parties a copy of this letter.

In addition, our review of wells within the 1/2 mile radius does not show any new water supply wells. However, one producing well is identified as having a total depth in the Morrison while the completion is above Morrison in the Dakota Formation. Information on this well is attached.

New Mexico Oil Conservation Div.

NOTICE
 Notice is hereby given that Amoco Production Company, 200 Amoco Court, Farmington, New Mexico 87401, 505-326-9200, Attn: Buddy Shaw, intends to drill the E. E. Elliott SWD No. 1 for water disposal. Application will be filed with the New Mexico Conservation Division, E. E. Elliott SWD No. 1 will be located in the NW 1/4 Section 26, Township 30 North, Range 9 West, N. M. P.M. the well will be drilled to a total depth of 853 feet. The injection zone will be the Permian Basin and Permian Formation. The disposal will be tested by a Step Rate Injection Test.
 This application was moved for approval for reasons as originally indicated in Legal Notice No. 2730, dated June 28, 1989.
 Any person, firm, association, or corporation of the State of New Mexico, or the United States of America, deeming that the granting of the application will impair or be detrimental to their water right may protest in writing the proposal set forth in said application. The protest shall set forth in writing all protest and reasons why the application should not be approved and must be filed with the Oil and Gas Conservation Division, PO Box 2088, Santa Fe, New Mexico 87501, within 15 days of the date of last publication of this Notice.
 Legal No. 25226 published in the Farmington Daily Times, Farmington, New Mexico on Sunday, April 29, 1990.
