## APPLICATION FOR AUTHORIZATION TO INJECT

- I. Purpose:  Secondary Recovery  Pressure Maintenance  Disposal  Storage  
Application qualifies for administrative approval?  Yes  No
- II. Operator: CIBOLA ENERGY CORPORATION  
Address: P. O. Box 1668    Albuquerque, NM 87103
- Contact party: Harvey E. Yates, Jr. Phone: (505) 843-6762
- III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project?  Yes  No  
If yes, give the Division order number authorizing the project \_\_\_\_\_.
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- \* VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
  2. Whether the system is open or closed;
  3. Proposed average and maximum injection pressure;
  4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
  5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- \*VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- \* X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)
- \* XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Harvey E. Yates, Jr. Title: President

Signature:   H   Date: July 14, 1992

- \* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal.

## III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

## XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

**NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.**

**NOTICE:** Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

Re: Application for Water Disposal Well

Duncan Federal #4Y  
Section 18: Lot 2  
Township 9 South, Range 28 East  
Chaves County, New Mexico

Gentlemen:

Cibola Energy Corporation has submitted to the Oil Conservation Division of the State of New Mexico an application to convert the existing Duncan Federal #4Y at the captioned location to a salt water disposal well.

Pursuant to Paragraph XIV of the attached Form C-108, a copy of our application is enclosed.

Any party desiring to file an objection or a request for hearing should address same to:

Oil Conservation Division  
P. O. Box 2088  
Santa Fe, New Mexico 87501

If we can assist you in your evaluation of this proposal, please call Mr. Harvey E. Yates, Jr. at (505)-843-6762.

Yours truly,

Duncan Federal #4Y

VII.

1. Proposed average and maximum daily rate and volume of fluids to be injected:

Initially, the injection volume should be approximately 10 barrels a day. This rate will increase as more of the Wolf Lake San Andres field is developed. Maximum volume will be approximately 150 barrels per day.

2. System will be closed; holding tank on location for water storage.

3. Maximum Injection Pressure Expected: 900 psi  
Average Injection Pressure Expected: 50 psi

4. Source of Injection Water:

The source is the San Andres from the Wolf Lake San Andres Field area. The disposal formation is the San Andres in the Wolf Lake San Andres Field area. Hence, no water analysis is required.

5. No chemical analysis is required because the disposal zone produces oil within a one mile area.

VIII.:

We propose to inject water into the P1 and P2 zones of the San Andres. The porosity zones into which water would be injected are shown on the attached electric log. Water would primarily go into the zone from 2208 to 2224 and from 2234 to 2260. Perforations cover a more limited area within these zones.

The zones are dolomite with anhydrite stringers. The top of the P1 is approximately 2198. The combined P1 and P2 is approximately 60 feet thick. The top of the San Andres itself is at approximately 1600 feet and the bottom of the San Andres is approximately 3000 feet.

The source of livestock and drinking water in the area lies above 400 feet and is known in the area as the Santa Rosa Sand. This zone is covered by surface casing.

IX.:

We think the well will take the necessary fluid without further stimulation. However, if further stimulation is necessary, we propose to acidize it with approximately 7,000 gallons of 20% HCL. Additional similar stimulation would be performed as needed.
