Attn: Mr. John Alexander

**Re: Injection Pressure Increase  
Stella Needs A Com Well No. 1E SWD  
San Juan County, New Mexico**

Dear Mr. Alexander:

Reference is made to your request dated April 16, 2002 (received in this office April 18, 2002), to increase the surface injection pressure on the above referenced SWD well. This request is based on a step rate test conducted on the well on April 2, 2002. After reviewing test results, we feel an increase in injection pressure is justified at this time.

This well is equipped with 2 7/8" coated tubing and injection packer. With size and type of tubing remaining the same, you are authorized to increase the surface injection pressure to the following:

Stella Needs A Com Well No. 1E SWD (API: 30-045-24265)	1562 PSIG Water
1790 FNL, 790 FWL, Sec 36, T30N, R14W, NMPM, San Juan County	

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

*Lori Wrotenbery*  
Lori Wrotenbery  
Director
