CHECKLIST for ADMINISTRATIVE INJECTION APPLICATIONS

Operator: Mewbourne Oil Corp Well: State 22 No. 1

Contact: Duane Brown Title: VP Eng Phone: 505.623.1996

DATE IN 3-27-97 RELEASE DATE 4-11-97 DATE OUT 5-19-97

Proposed Injection Application is for: ___ **WATERFLOOD** ___ Expansion ___ Initial

Original Order: R- _____ ___ Secondary Recovery ___ Pressure Maintenance

SENSITIVE AREAS X **SALT WATER DISPOSAL** ___ Commercial Well

___ WIPP ___ Capitan Reef

Data is complete for proposed well(s)? Yes Additional Data Req'd _____

AREA of REVIEW WELLS

0 Total # of AOR 1 # of Plugged Wells

1 Tabulation Complete ___ Schematics of P & A's

___ Cement Tops Adequate ___ AOR Repair Required

INJECTION FORMATION

Injection Formation(s) San Andres Compatible Analysis Yes

Source of Water or Injectate Area Production

PROOF of NOTICE

Yes Copy of Legal Notice ✓ Information Printed Correctly

✓ Correct Operators ✓ Copies of Certified Mail Receipts

No Objection Received No Set to Hearing _____ Date

NOTES: _____

APPLICATION QUALIFIES FOR ADMINISTRATIVE APPROVAL? Yes

COMMUNICATION WITH CONTACT PERSON:

1st Contact: ___ Telephoned ___ Letter _____ Date Nature of ~~Discussion~~

2nd Contact: ___ Telephoned ___ Letter _____ Date Nature of ~~Discussion~~

3rd Contact: ___ Telephoned ___ Letter _____ Date Nature of ~~Discussion~~

STATE OF NEW MEXICO
ENERGY AND MINERALS DEPARTMENT

OIL CONSERVATION DIVISION
POST OFFICE BOX 2088
STATE LAND OFFICE BUILDING
SANTA FE, NEW MEXICO 87501

FORM C-108
Revised 7-1-81

657

APPLICATION FOR AUTHORIZATION TO INJECT

I. Purpose: ☐ Secondary Recovery ☐ Pressure Maintenance ☒ Disposal ☐ Storage
Application qualifies for administrative approval? ☐ yes ☐ no

II. Operator: Manzano Oil Corporation

Address: P.O. Box 2107, Roswell, NM 88202-2107

Contact party: Donnie E. Brown Phone: (505) 623-1996

III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project? ☐ yes ☒ no
If yes, give the Division order number authorizing the project _____.

V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

* VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

VII. Attach data on the proposed operation, including:

1. Proposed average and maximum daily rate and volume of fluids to be injected;
2. Whether the system is open or closed;
3. Proposed average and maximum injection pressure;
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

*VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.

IX. Describe the proposed stimulation program, if any.

* X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)

* XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.

XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.

XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.

XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: Donnie E. Brown Title VP Engineering

Signature: Donnie E. Brown Date: March 11, 1997

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal. _____

DISTRIBUTION: Original and one copy to Santa Fe with one copy to the appropriate Division

III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

(1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.

(2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.

(3) A description of the tubing to be used including its size, lining material, and setting depth.

(4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

(1) The name of the injection formation and, if applicable, the field or pool name.

(2) The injection interval and whether it is perforated or open-hole.

(3) State if the well was drilled for injection or, if not, the original purpose of the well.

(4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.

(5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

(1) The name, address, phone number, and contact party for the applicant;

(2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;

(3) the formation name and depth with expected maximum injection rates and pressures; and

(4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

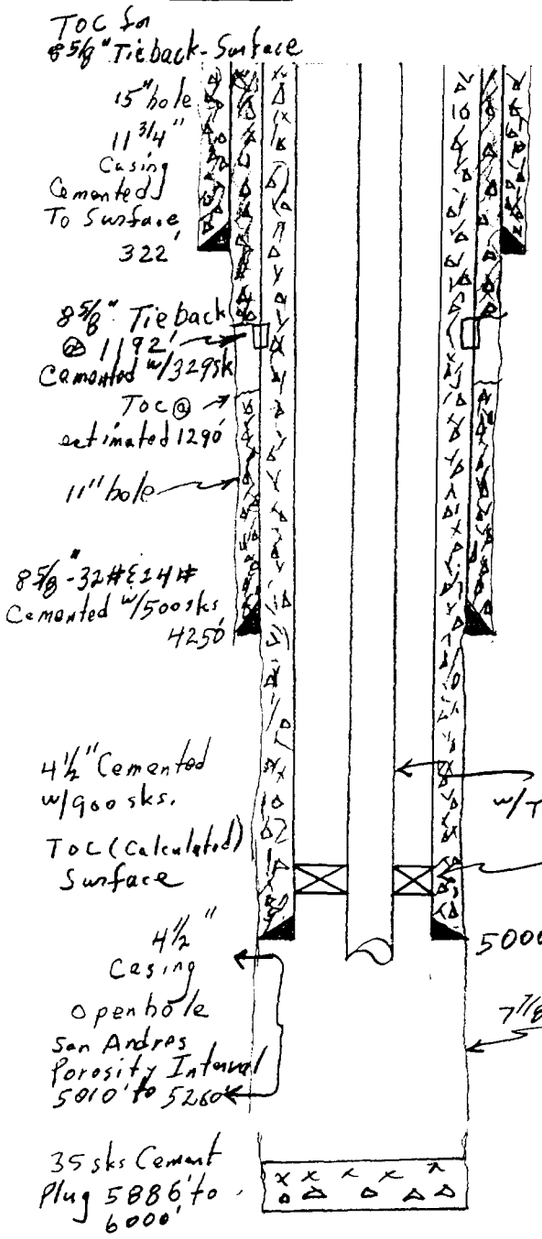
Schematic



Tabular Data

Surface Casing

Size 11-3/4" Cemented with 400 sx.

TOC surface feet determined by inspection

Hole size 15"

Intermediate Casing

Size 8-5/8" Cemented with 500 sx.

TOC surface feet determined by inspection

Hole size 11"

Long string

Size 4-1/2" Cemented with 900 sx.

TOC surface feet determined by volumetric

Hole size 7-7/8"

Total depth 5000'

Injection interval

5000' feet to 5886' feet

(~~perforated~~ or open-hole, indicate which)

Tubing size 2-3/8" lined with Tuboscope TK-21 (material) set in a

Baker Loc-Set (brand and model) packer at 4990 feet

(or describe any other casing-tubing seal).

Other Data

1. Name of the injection formation San Andres

2. Name of Field or Pool (if applicable) _____

3. Is this a new well drilled for injection? [ ] Yes [X] No

   If no, for what purpose was the well originally drilled? Originally drilled to the Devonian to test for oil and gas. P&A 2/21/62. See attached schematic for P&A details.

4. Has the well ever been perforated in any other zone(s)? List all such perforated intervals and give plugging detail (sacks of cement or bridge plug(s) used) No zones perforated. Production casing never run. See attached schematic for P&A details of cement plugs.

5. Give the depth to and name of any overlying and/or underlying oil or gas zones (pools) in this area. Underlying - Devonian

   Overlying - None

Form C-108
Page Two
Dated: March 11, 1997
Operator: Manzano Oil Corporation
Well: State "22" #1
Sec 22, T10S, R37E
Lea County, NM

V. Map attached. See Exhibit V.

VI. No wells within the area of review (1/2 mile radius).

VII. 1. Average daily rate of salt water injected will be approximately 500 bbls/day. The maximum rate will be approximately 800 bbls/day. Volume of salt water injected will be approximately 15,000 bbls/month.

2. The system will be closed.

3. The average injection pressure is expected to be 100 psi. The maximum injection pressure should not be over 900 psi.

4. Sources for the disposal water will be the Manzano "SV" Sundown State #1, Section 14, T10S, R37E, and the Manzano "SV" Sunrise State #1, Section 15, T10S, R37E. Both wells produce from the Devonian. A water analysis of the produced water is attached. Exhibits VII.4a., b. and c.

5. Water analysis of San Andres zone is attached. Exhibit VII.5.a. Exhibit VII.5.b. is a comparison between the Devonian water and San Andres water. Scaling potential is nil to marginal.

VIII. The proposed zone for salt water disposal is the San Andres zone at a depth of 5010' in the Union Oil Company of California State "22" #1. The porous interval in which the salt water will be injected is from a depth of 5010' to 5260'. This interval consists of Dolomite. The closest San Andres oil production is some 4 miles to the northeast of this well, with oil production coming from the upper portion of the San Andres.

The maximum depth for underground sources of drinking water in the area is 300'. These zones will be protected with 13-3/8" and 8-5/8" casing with cement circulated to surface on both strings.

There are no underground sources of drinking water underlying the San Andres in this area.

IX. The proposed San Andres zone will be acidized with 10,000 gallons of 20% HCl acid if necessary.

X. There is no test data at this time on the San Andres. A copy of that portion of the sonic log and laterolog over the proposed disposal interval in the San Andres is attached (Exhibit X). A complete set of open hole logs of this well has already been filed with the division by Union Oil Company of California.

XI. Attached is a chemical analysis of a fresh water well that is within one mile of the proposed disposal. This sample was analyzed on 1/04/96. See Exhibit XI.

XII. Manzano Oil Corporation has examined all available geological and engineering data in the surrounding area of the proposed disposal well and finds no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.

XIII. Proof of notice is attached. See Exhibit XIII.A. and XIII.B.

Calcium Sulfate Solubility Profile

*Milli Equivalents per Liter

This water is somewhat corrosive due to the pH observed on analysis.
The corrosivity is increased by the content of mineral salts in solution.
