Dear Ms. Perez:

We are in receipt of your letter of February 6, 2001. Your letter requests our approval to surface commingle the production from the above captioned wells from the Basin Fruitland Coal, Blanco Mesaverde, Blanco Pictured Cliffs, and Basin Dakota pools.

It is our understanding that production from the above captioned wells will be measured separately prior to being surface commingling at the State Com G2 Central Facility located in the NW/4SW/4 of Section 32-29N-08W.

Since it appears that all the New Mexico Oil Conservation Division's rules and regulations have been complied with, and there will be no loss of revenue to the State of New Mexico as a result of your proposed operation, your request is hereby approved. Our approval is subject to like approval by the New Mexico Oil Conservation Division.

Please submit a \$30.00 dollar filing.

If you have any questions or if we may be of further help, please contact Pete Martinez at (505) 827-5791.

|     | #E-1202         | SW/4SW/4                        |

(3) The reason for commingling is to be able compress all wells with one single compressor instead of individual wellhead units.

(4) Production will be allocated according to DHC orders and allocation meters. Each well has its own allocation meter.

Sincerely,
