Director

RE: Surface Commingling, Lease Commingling
and Off-Lease Storage
North Dagger Draw Upper Penn Pool
Eddy County, New Mexico

Dear Mr. LeMay:

Yates Petroleum Corporation respectfully requests administrative approval to commingle production from three wells into a common tank battery and to permit production from each well to be transported prior to measurement to another well for storage thereon. It is proposed to commingle the production from the following wells:

- | | |
|-----------------------------|------------------------------|
| Hooper AMP #1 | Hooper AMP #2 |
| Unit M, 820' FSL & 660' FWL | Unit E, 1980' FNL & 660' FWL |
| Section 21-T19S-R25E | Section 21-T19S-R25E |
| Eddy County, New Mexico | Eddy County, New Mexico |
| Fee Lease | Fee Lease |
-
- | |
|-----------------------------|
| Patriot AIZ Com #3 |
| Unit P, 760' FSL & 660' FEL |
| Section 20-T19S-R25E |
| Eddy County, New Mexico |

The production from the three wells will be commingled into a common storage facility located on the Hooper AMP #1 location. A map labeled Attachment I is enclosed for your information.

The purpose of this off-lease storage and surface commingling is to reduce operating costs for storage and treating and thereby extend the economic life of each well. Without approval for utilizing existing batteries on adjacent leases, it will become necessary to build separate facilities for each well. This will greatly increase costs and shorten the economic life of the well.

Because working interests for the proposed wells are different from the well where the proposed storage facilities are located, oil from each of the wells

Off-Lease Storage, Etc.:

Page 2:

October 28, 1993

will be measured by positive displacement, temperature compensated metering equipment prior to surface commingling. Gas from the wells will also be metered separately. This metering will ensure that all production from each of the wells is equitably accounted for with no significant effect on your revenue. The production in the three wells will be from the same producing zone which is the Canyon.

In accordance with the Oil Conservation Division's Rules 303-B, 309-B and 309-C, the following diagrams and maps are submitted for your information.

Attachment II A diagram of the proposed measurement equipment, separators and storage tanks in accordance with the "Manual for Installation and Operation of Commingling Facilities".

Attachment III Notification of working interest owners of the proposal to commingle production.

Attachment IV Notification to the Bureau of Land Management.

Yates Petroleum Corporation appreciates your cooperation in this matter. If you should have any questions or need further information, please give me a call at 505-748-1471.

Thank you.

Sincerely,

Rusty Klein
Production Clerk

RE: Surface Commingling, Lease Commingling
and Off-Lease Storage
North Dagger Draw Upper Penn Pool
Eddy County, New Mexico

Dear Mr. Manus:

Yates Petroleum Corporation respectfully requests approval to commingle production on the surface from three wells in the captioned pool which would include off-lease storage and off-lease measurement for all three wells. This is proposed for the following wells:

Hooper AMP #1
Unit M, 820' FSL & 660' FWL
Section 21-T19S-R25E
Eddy County, New Mexico
Fee Lease

Hooper AMP #2
Unit E, 1980' FNL & 660' FWL
Section 21-T19S-R25E
Eddy County, New Mexico
Fee Lease

Patriot AIZ Com #3
Unit P, 760' FSL & 660' FEL
Section 20-T19S-R25E
Eddy County, New Mexico

A battery is located on the Hooper AMP #1 location, into which we would commingle the production from the three wells. Although the production will be commingled into a common battery, each individual well's production will be measured separately by positive displacement, temperature compensated metering equipment prior to commingling. This will ensure that all production from each well will be accounted for equitably. Attachment II is a diagram of the proposed metering facilities and the consolidated tank batteries, and identifies all equipment utilized.

A map labeled Attachment I is enclosed showing the location of each of the wells.

Off-Lease Storage, Etc.:

Page 2:

October 28, 1993

The purpose of the off-lease storage and surface commingling is to reduce the operating costs and capital costs for storage and thereby extend the economic life of the well. Without approval for utilizing existing batteries on adjacent leases, it will become necessary to build separate facilities for each well. This will greatly increase costs and shorten the economic life of the well.

Yates Petroleum Corporation appreciates your cooperation in this matter. If you should have any questions or need further information, please give me a call at 505-748-1471.

Thank you.

Sincerely,

A handwritten signature in cursive script that reads "Rusty Klein".
