Mr. Mike Stogner  
New Mexico Oil Conservation  
P. O. Box 2088  
Santa Fe, New Mexico 87501

Dear Mr. Stogner:

Bass Enterprises Production Co. respectively requests approval of Off-Lease Storage and Measurement of production from the James Ranch Unit #30 Lease. Production from the James Ranch Unit #30 will be metered separately at the James Ranch Unit #7 Battery prior to being commingled with production from the James Ranch Unit #7 Lease. Approval of this request for Off-Lease Storage and Measurement will allow for more efficient operations with a consolidated battery by reducing the number of stock tanks (2) and water tanks (1). Surface disturbance will also be minimized by using the existing facility. Full wellstream production will be transported via flowline to a three phase heater treater. Oil, water and gas will be separated at this vessel. The oil and water will be metered prior to being stored in the commingled stock tanks and water tank. The gas will be metered via a separate sales meter. Estimated production from the James Ranch Unit #30 lease will be 347 BO and 118 BW and 425 MCF per day. The James Ranch Unit #7 produces 13 BO and 0 BW and 40 MCF per day.

If you have any questions, please contact Keith Bucy or myself at the letterhead address.

Very truly yours,

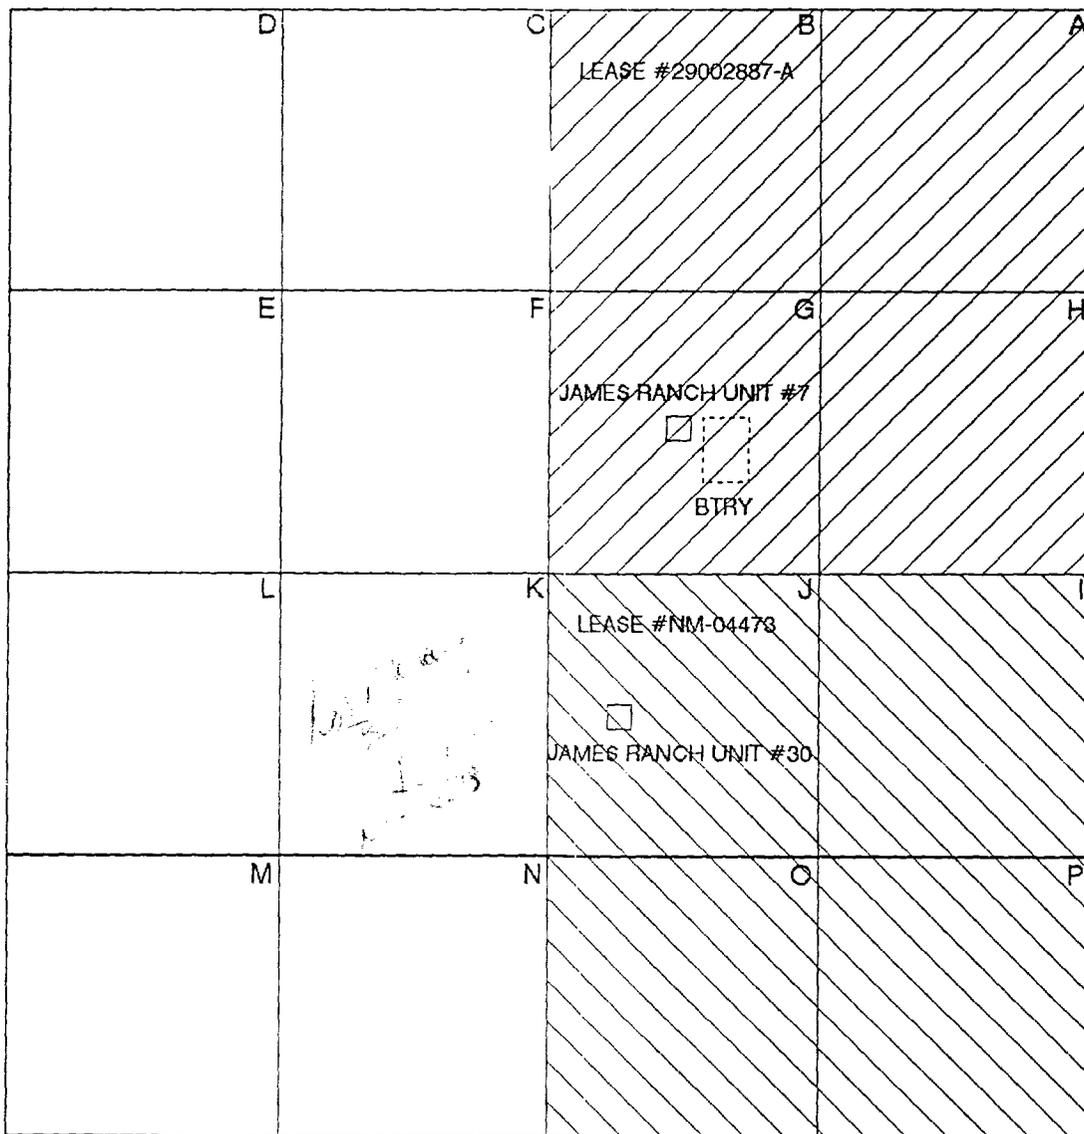

George A. Teer  
Division Production Manager
