all in T-23-S, R-28-E,  
Eddy County, New Mexico

Gentlemen:

Per instructions from the Artesia office of the New Mexico Oil and Gas Commission, we are, by this letter, formally requesting your permission to co-mingle all production (gas and oil) from the hereinabove referenced wells. The production from each well will be metered by industry-accepted methods before co-mingling, and careful records will be maintained of such production.

This request is occasioned by first, our need to generate enough casing, head natural gas to justify the expense of installing a gas compressor in order to sell the gas into El Paso Natural Gas Company's 400+ pound line, and to have a sufficient quantity of gas to keep a compressor operating. Secondly, none of these wells make enough oil to support the cost of separators, heat treaters, and storage tanks, but co-mingled, they should do so.

As you may or may not be aware, the Bone Springs production in this area is not bountiful, however, there will be a significant amount of natural gas produced with accompanying oil production over a period of time if operators in the area can find less expensive ways to drill, complete, and produce the wells.

This request is one way in which we can hope to minimize our costs in the area, and is made possible by the proximity of the wells to each other and to a gas market.

Enclosed here within are:

- 1) Maps of the area with the acreage involed marked in yellow,
- 2) Copies of our well location and Acreage Dedication Plats filed with your office,
- 3) A schematic drawing of our proposed metering, separation, storage facility, and compressor, all located on the Pad at the Giovengo #1 well with flow lines indicated coming from our Ray Howard #1 and Williams #1 wells.

We have written the land and mineral owners involved under the referenced wells in addition to the working interest owners and have in writing, their approval of the requested co-mingling.

We trust you will approve our request. Should you have further questions, or need information, please advise us and we shall make every effort to satisfy you.

Very truly yours,

DINERO OPERATING COMPANY

State of New Mexico  
Oil Conservation Division  
Box 2088  
Santa Fe, New Mexico 87501

Dear Mr. Nutter:

Enclosed please find the new drawing for the proposed commingling of the Williams, Ray Howard, and Giovengo wells located in Section 25, T-23-S, R-28-E, Eddy Co., New Mexico, operated by Dinero Operating Company.

If any more information is required, please let me know, as we would like to complete this project as soon as possible.

Thank you for your consideration in this matter.

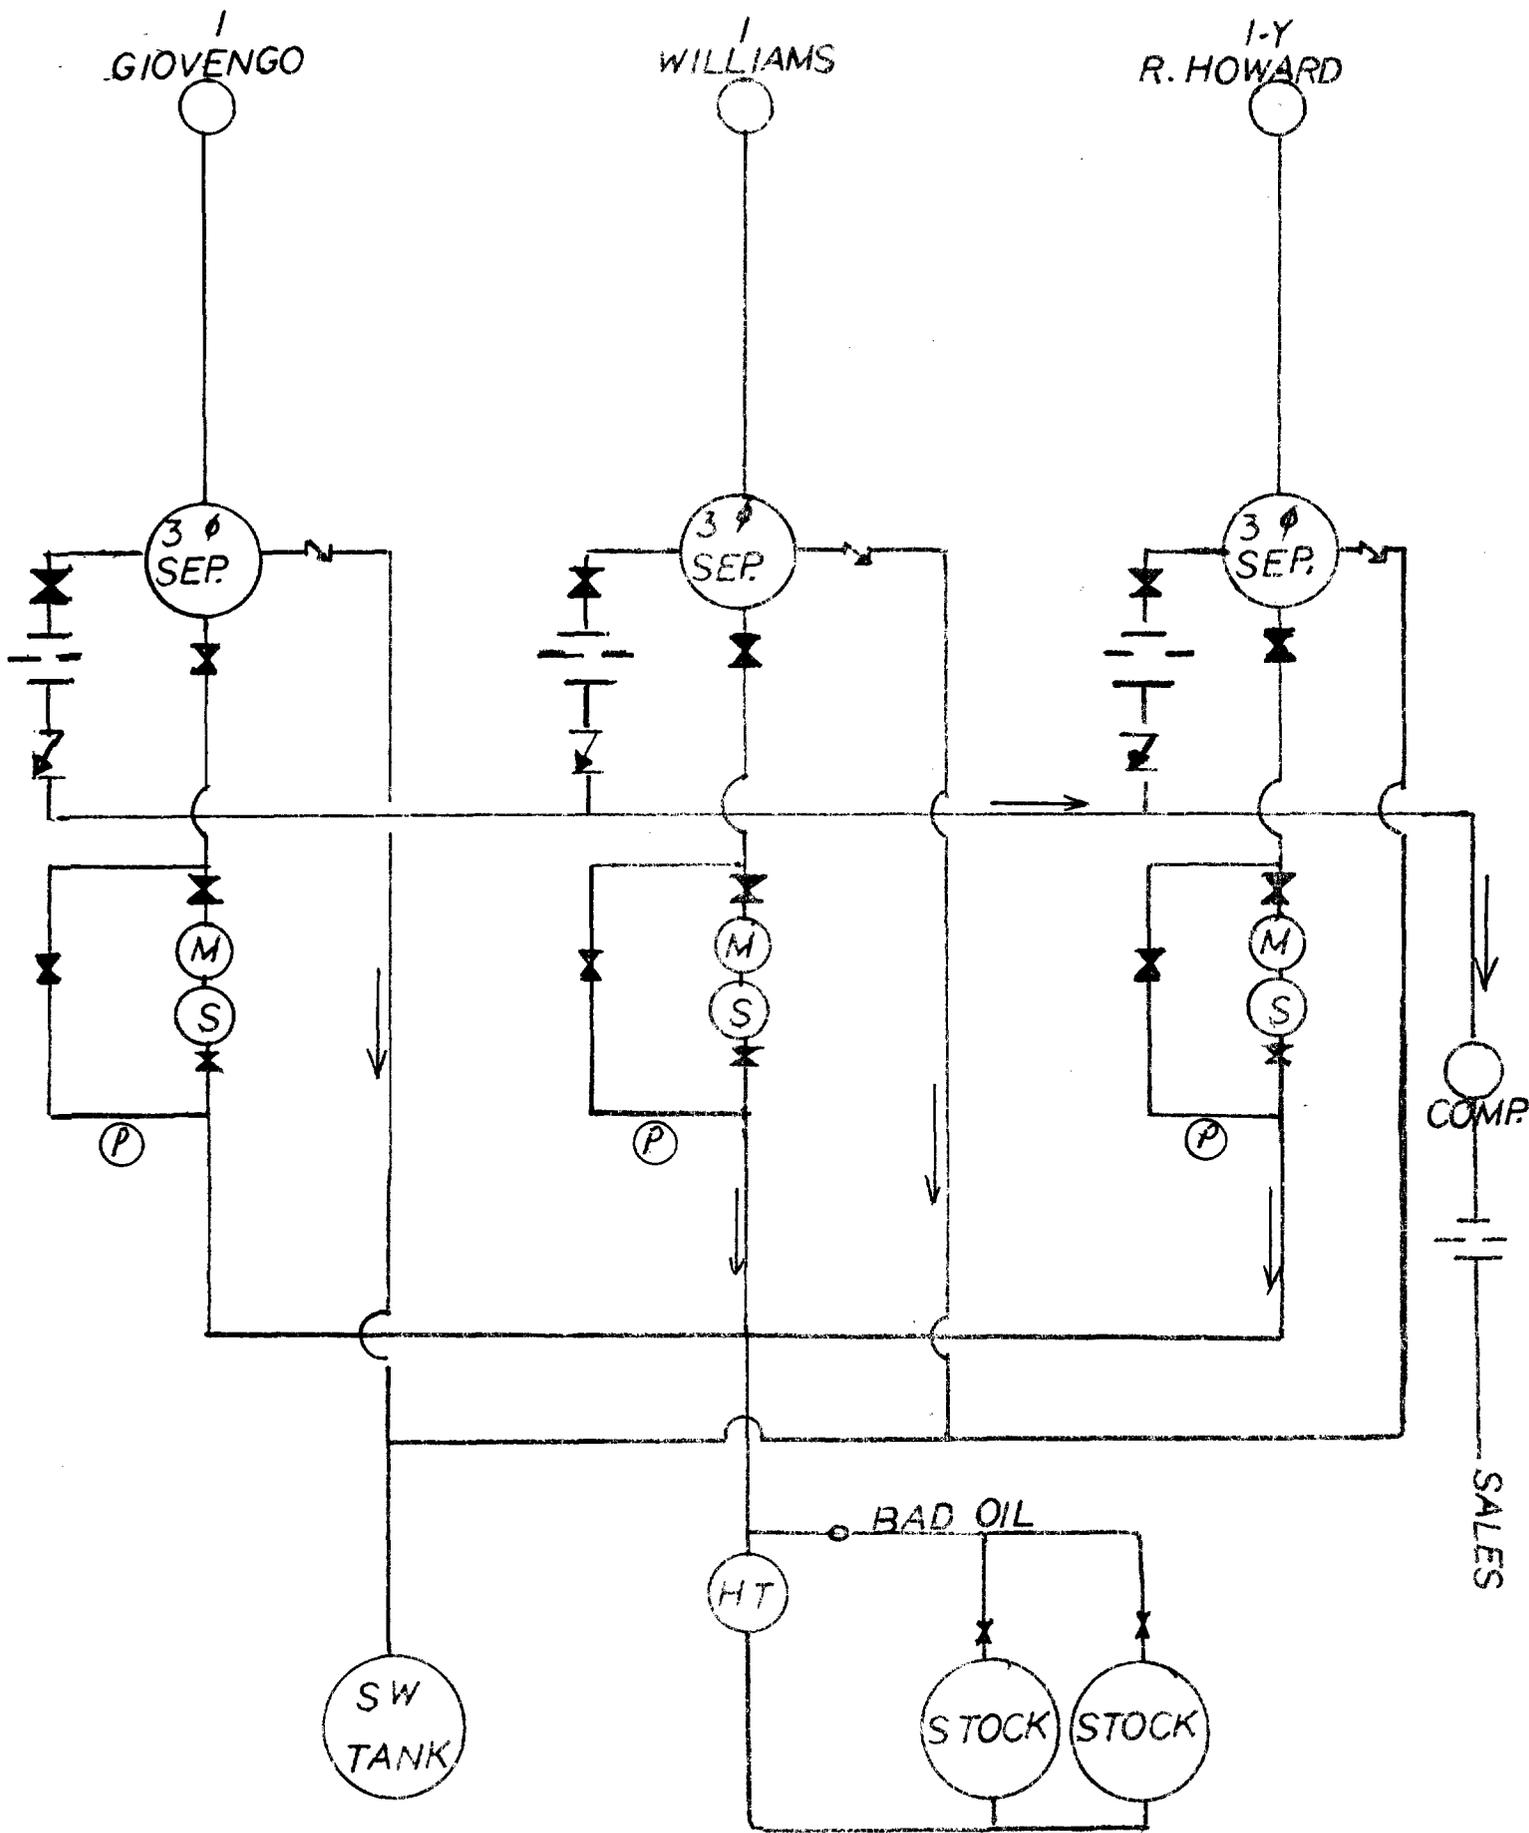

Sincerely,

DINERO OPERATING COMPANY

Lavonda Norman

Re: Commingling of production from Ray Howard, Williams and  
Giovengo well, Carlsbad, Eddy County, New Mexico

Dear Mr. Ramsland:

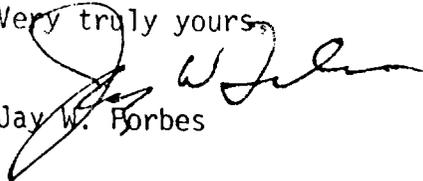

This letter confirms our long distance telephone conversation of 18 February 1982, where I advised you that Mr. Giovengo had authorized me to instruct you that he would agree to the proposed commingling. It therefore will not be necessary for your field people to unhook the gas compressor from the Giovengo connection on the 22nd of February 1982.

Mr. Giovengo, as I explained, just wants to be sure that he gets all of the oil that is produced from his well. I feel that it will reassure Mr. Giovengo that the Oil Conservation Commission requires checking of the instrumentation and metering on the well every month to insure accuracy.

Mr. Giovengo is also concerned that the pumpers of the well are not doing as good as a job as they might do and by carbon copy of this letter I am advising Mr. Giovengo that there has been some information that the pumpers feel the Giovengos are tampering with the various valves on the well. Mr. Giovengo will be instructed by me that he and his family are not to go upon the properties, as not only are problems in the metering concerned, but there can be a danger to members of his family.

Lastly, as I stated to you in our telephone conversation, Mr. Giovengo has considered utilizing that portion of his contract to use gas from the well in his home. Though Mr. Giovengo has this right, I would discourage it, as I feel that since this gas would have to pass through regulators, there is a very very strong possibility that the risk involved would be much greater than any benefit gained by having free gas. I, of course, will be talking with Mr. Giovengo about all of these points, but wanted to confirm our telephone conversation. Thank you for your continued cooperation.

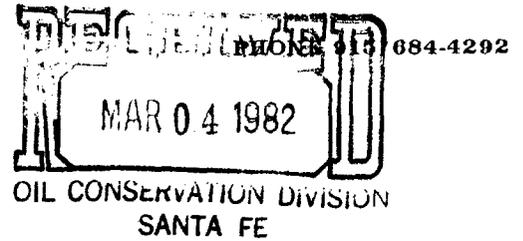

Very truly yours,

  
Jay W. Forbes

RE: Commingle Giovengo No. 1,  
Williams No. 1, Ray Howard  
No. 1, Eddy County, New  
Mexico

Gentlemen:

Enclosed please find the original and several copies of the schematic for the proposed commingling of the above referenced wells. I have also enclosed a copy of the letter sent to all of the Working Interest Owners, Royalty Owners and Overriding Royalty Owners.

Please let me know if this meets the requirements of Rule 309-B and what more will be required in order to commingle these wells.

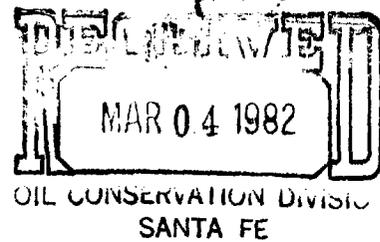

Sincerely,

DINERO OPERATING COMPANY

Lavonda Norman

Gentlemen:

We have your letter of January 15, 1982 requesting permission to commingle the production from the above referenced wells.

This is to advise that we will take no action in connection with your request until such time as you commence the payment of royalties which have accrued to the interest of Betty Witherspoon Nevill, Trustee for the Gayle Nevill Trust and the Virginia Nevill Trust, which are now unpaid and long overdue.

Will you please check with your Production Accounting Department and advise when we may expect to receive royalties accruing to these interests.

Yours very truly,

  
Guy L. Nevill

Gentlemen:

This is to notify you of our intention to commingle the production from the above referenced wells. The hydrocarbon production from each lease shall be accurately measured and determined through a metering separator and the gas will be measured through a compressor into the sales line.

The above action is necessary due to the high cost of the compressors and being unable to get into a high pressure gas line without the aid of a compressor.

If you have no objection to this action, please sign in the space provided below and return the original copy to this office as soon as it is possible for you to do so.

Thank you for your attention to this matter.

Sincerely,

DINERO OPERATING COMPANY

 Ray Howard No.1-Y, Section 25, T-23-S, R-23-E, Eddy County, New Mexico

Gentlemen:

This is to notify you of our intention to commingle the production from the above referenced wells. The hydrocarbon production from each lease shall be accurately measured and determined through a metering separator and the gas will be measured through a compressor into the sales line.

The above action is necessary due to the high cost of the compressors and being unable to get into a high pressure gas line without the aid of a compressor.

If you have no objection to this action, please sign in the space provided below and return the original copy to this office as soon as it is possible for you to do so.

Thank you for your attention to this matter.

Sincerely,

DINERO OPERATING COMPANY

Attention: Labonda Norman

Dear Ms. Norman:

X-Pert Energy Corporation has no objection to the commingle procedure proposed in Dinero's letter of January 15, 1982. It is our understanding that Oil and Gas production will be measured from each lease separately and credited to the proper lease.

Please furnish potential test or last production data available on the above subject leases.

Sincerely,

D. E. Morris

This is to notify you of our intention to commingle the production from the above referenced wells. The hydrocarbon production from each lease shall be accurately measured and determined through a metering separator and the gas will be measured through a compressor into the sales line.

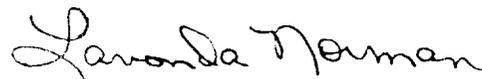

The above action is necessary due to the high cost of the compressors and being unable to get into a high pressure gas line without the aid of a compressor.

If you have no objection to this action, please sign in the space provided below and return the original copy to this office as soon as it is possible for you to do so.

Thank you for your attention to this matter.

Sincerely,

DINERO OPERATING COMPANY

This is to notify you of our intention to commingle the production from the above referenced wells. The hydrocarbon production from each lease shall be accurately measured and determined through a metering separator and the gas will be measured through a compressor into the sales line.

The above action is necessary due to the high cost of the compressors and being unable to get into a high pressure gas line without the aid of a compressor.

If you have no objection to this action, please sign in the space provided below and return the original copy to this office as soon as it is possible for you to do so.

Thank you for your attention to this matter.

Sincerely,

DINERO OPERATING COMPANY
