New Mexico Oil Conservation Division
P. O. Box 2088
Santa Fe, New Mexico, 87501

Attention: Mr. Joe D. Ramey

Gentlemen:

In a recent application, we requested the Administrative approval for surface commingling of hydrocarbon production from the Paduca Delaware pool between the E. F. Ray "B" Federal (NCT-1), G. E. Jordan Federal (NCT-1), and Cotton Draw Unit Battery No. 1 Leases.

Texaco received your Administrative approval to surface commingle the subject properties on September 2, 1980, in Commingling Order CTB-283. However, after reviewing the stipulations of the Commingling Order and the cost of compliance, Texaco would now like to cancel this Order.

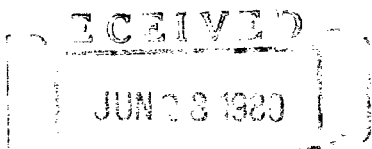

Yours very truly,

TEXACO INC.

Santa Fe, New Mexico 87501

Attention: Mr. Joe D. Ramey

Gentlemen:

In accordance with New Mexico Oil Conservation Division Rule 309-B, Texaco Inc. respectfully requests Administrative approval of an exception to Rule 309-A to permit commingling of Hydrocarbon production from the Paduca Delaware pool between the E. F. Ray "B" Federal (NCT-1), G. E. Jordan Federal (NCT-1) and Cotton Draw Unit Battery No. 1 leases.

The above leases have a diversity of ownership, therefore, the oil and gas from E. F. Ray "B" Federal (NCT-1) and G. E. Jordan Federal (NCT-1) will be metered prior to commingling. The total production will be metered as it is sold and the subtraction method used to determine Cotton Draw Unit oil and gas. A schematic diagram of the proposed commingling installation and a plat of the leases showing all wells and the formation in which they are completed are attached.

By copy of this letter and in accordance with paragraph 4, rule 309-B, all parties owning an interest in these leases and the Texas-New Mexico Pipeline Company have been notified by Certified Letter of our intentions to commingle these leases.

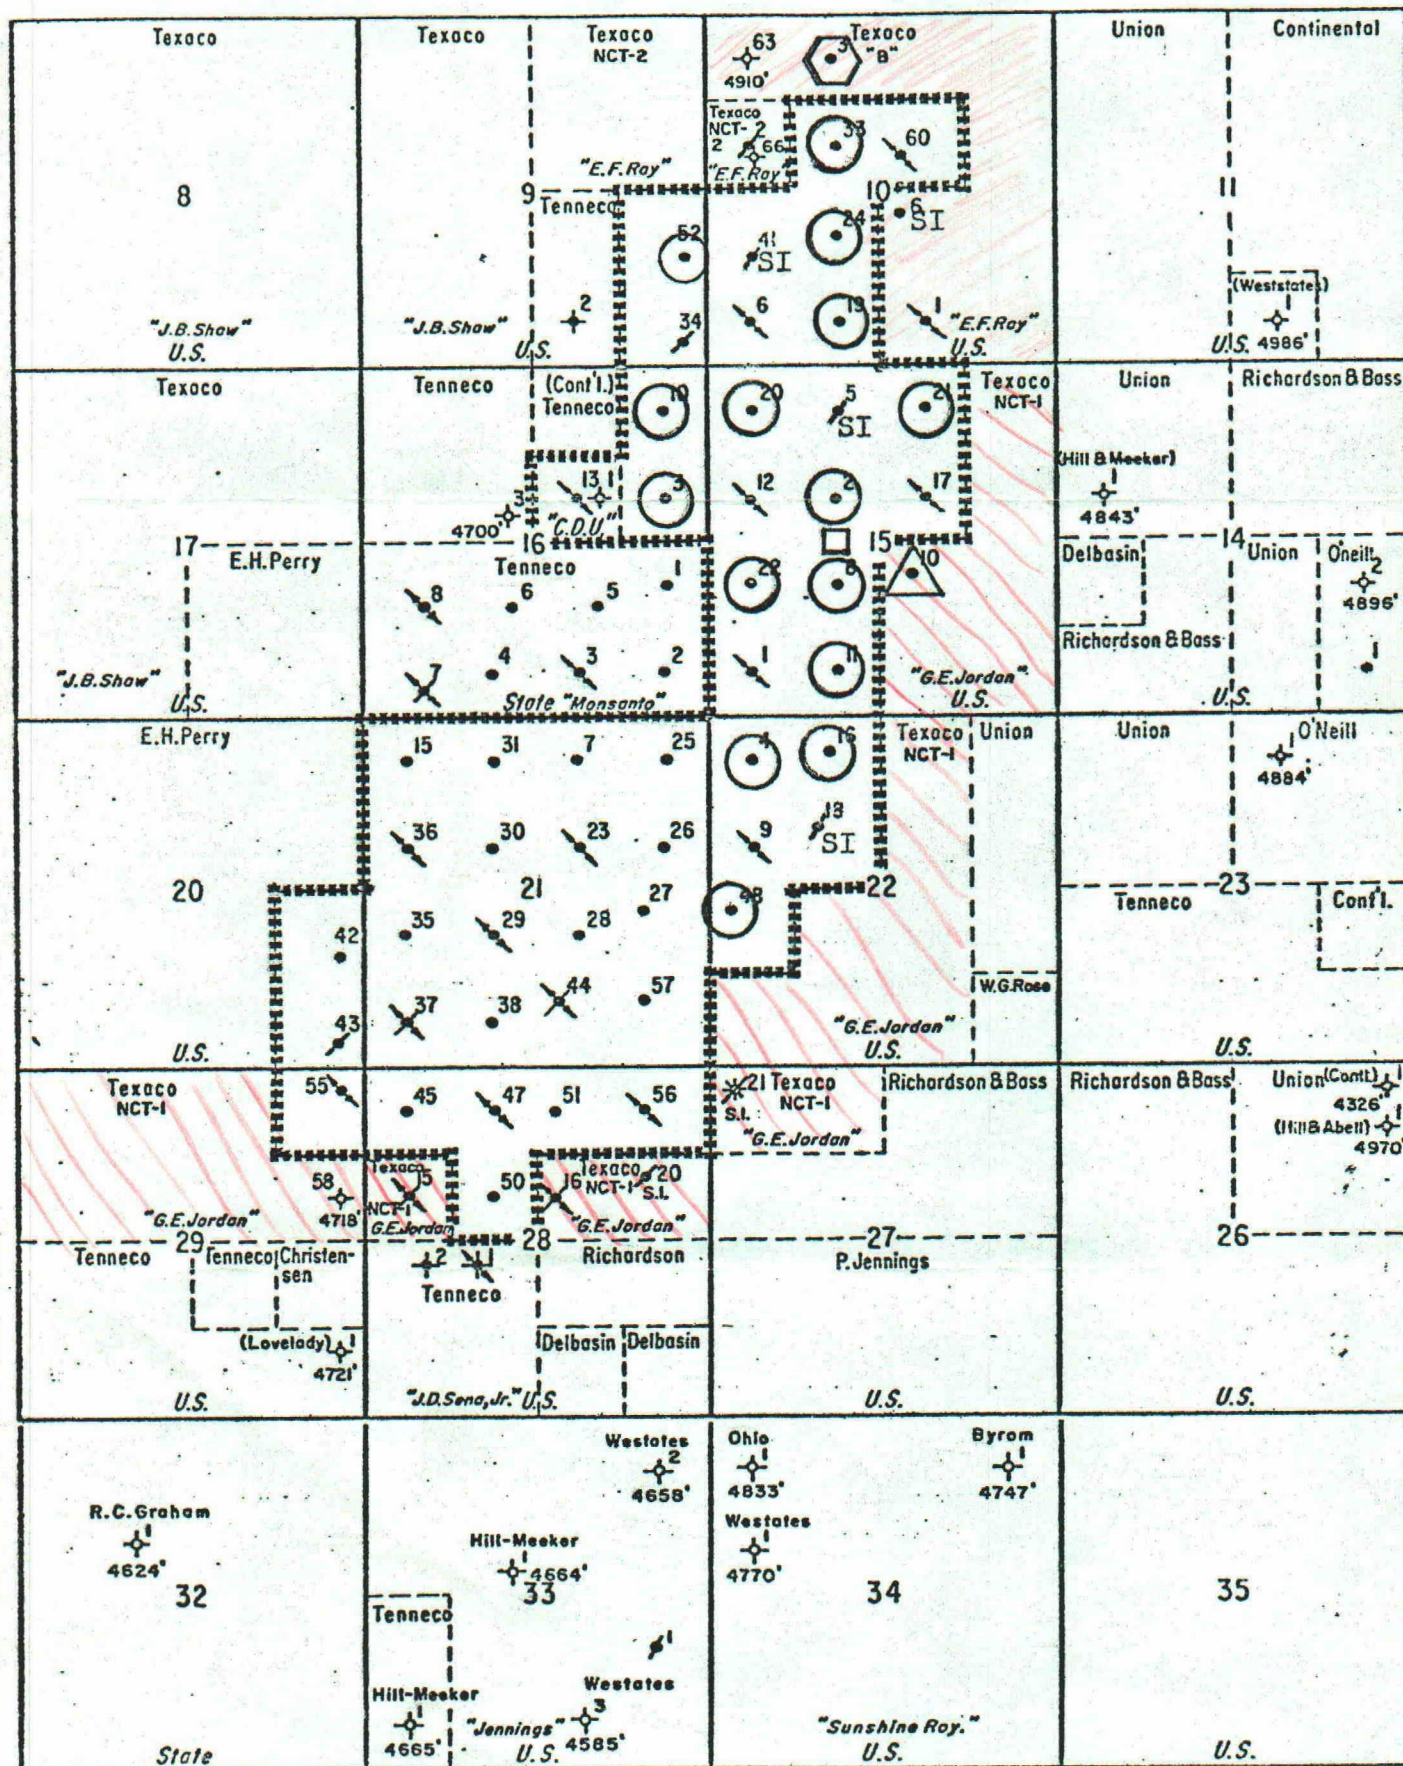

A copy of this application is being sent to the United States Geological Survey, Hobbs, New Mexico, requesting their approval.

Yours very truly,

TEXACO INC.
