Gentlemen:

BP America Production Company requests approval for a new surface commingle permit to gather gas and transport to one lease, compress the gas in one compressor, and sell the gas through one central sales point. The gas from each well will be metered separately prior to movement off lease and the individual well volumes will be allocated back based on metered production. A schematic of the commingling plan is attached to support the gas movement.

All wells in this application are flowing gas wells. All fluid produced on the individual leases will be kept on the respective leases.

Working and royalty interests have been notified of this application on October 9, 2002.

Your cooperation in this matter will be appreciated. If you have any questions, please contact me at 281/366-7655. Please send your approval to proceed to my attention at the address listed above.

Yours very truly,

It is our understanding that each well will be metered separately prior to the movement off lease and the individual well volumes will be allocated back based on metered production. The fluid produced on the individual leases will be kept on the respective leases.

Since it appears that all the New Mexico Oil Conservation Division's rules and regulations have been complied with, and there will be no loss of revenue to the State of New Mexico, as a result of your proposed operation, your request is hereby approved. Our approval is subject to like approval by the New Mexico Oil Conservation Division and the Bureau of Land Management.
