Gentlemen:

Xeric Oil & Gas Corporation requests an amendment to the above referenced order to include production from the East Warren Drinkard (Oil 63120) on both referenced wells with a date retroactive to the original effective date (9/3/02). The order currently allows commingling production from both wells for the DK; Abo (Oil-15200).

This amendment would allow us to plug back the DK; Abo and test the East Warren Drinkard in both wells. We have filed an Application to Downhole Commingle the Porfidio State Well which would result in production from both pools to be commingled at the surface. For the time we plan to leave the Julio State in the East Warren Drinkard.

As with the original order, production will be allocated back to each well based on periodic well tests.

Ownership and revenue are identical in the two leases and pools. All working and royalty interest owners have been notified of commingling plans.

Enclosed are the C-102's for both wells and both pools.

Your help in this matter will be appreciated. If you have any questions, please contact me at 915-683-3171.

Yours truly,

Angie Crawford
