Administrative Order OLS- 39

Dear Sir:

Reference is made to your application dated May 10, 1965, for administrative approval for off-lease storage for your Collyer Well No. 1 located in Unit B of Section 10, Township 11 South, Range 33 East, North Bagley Upper Pennsylvanian Pool, Lea County, New Mexico.

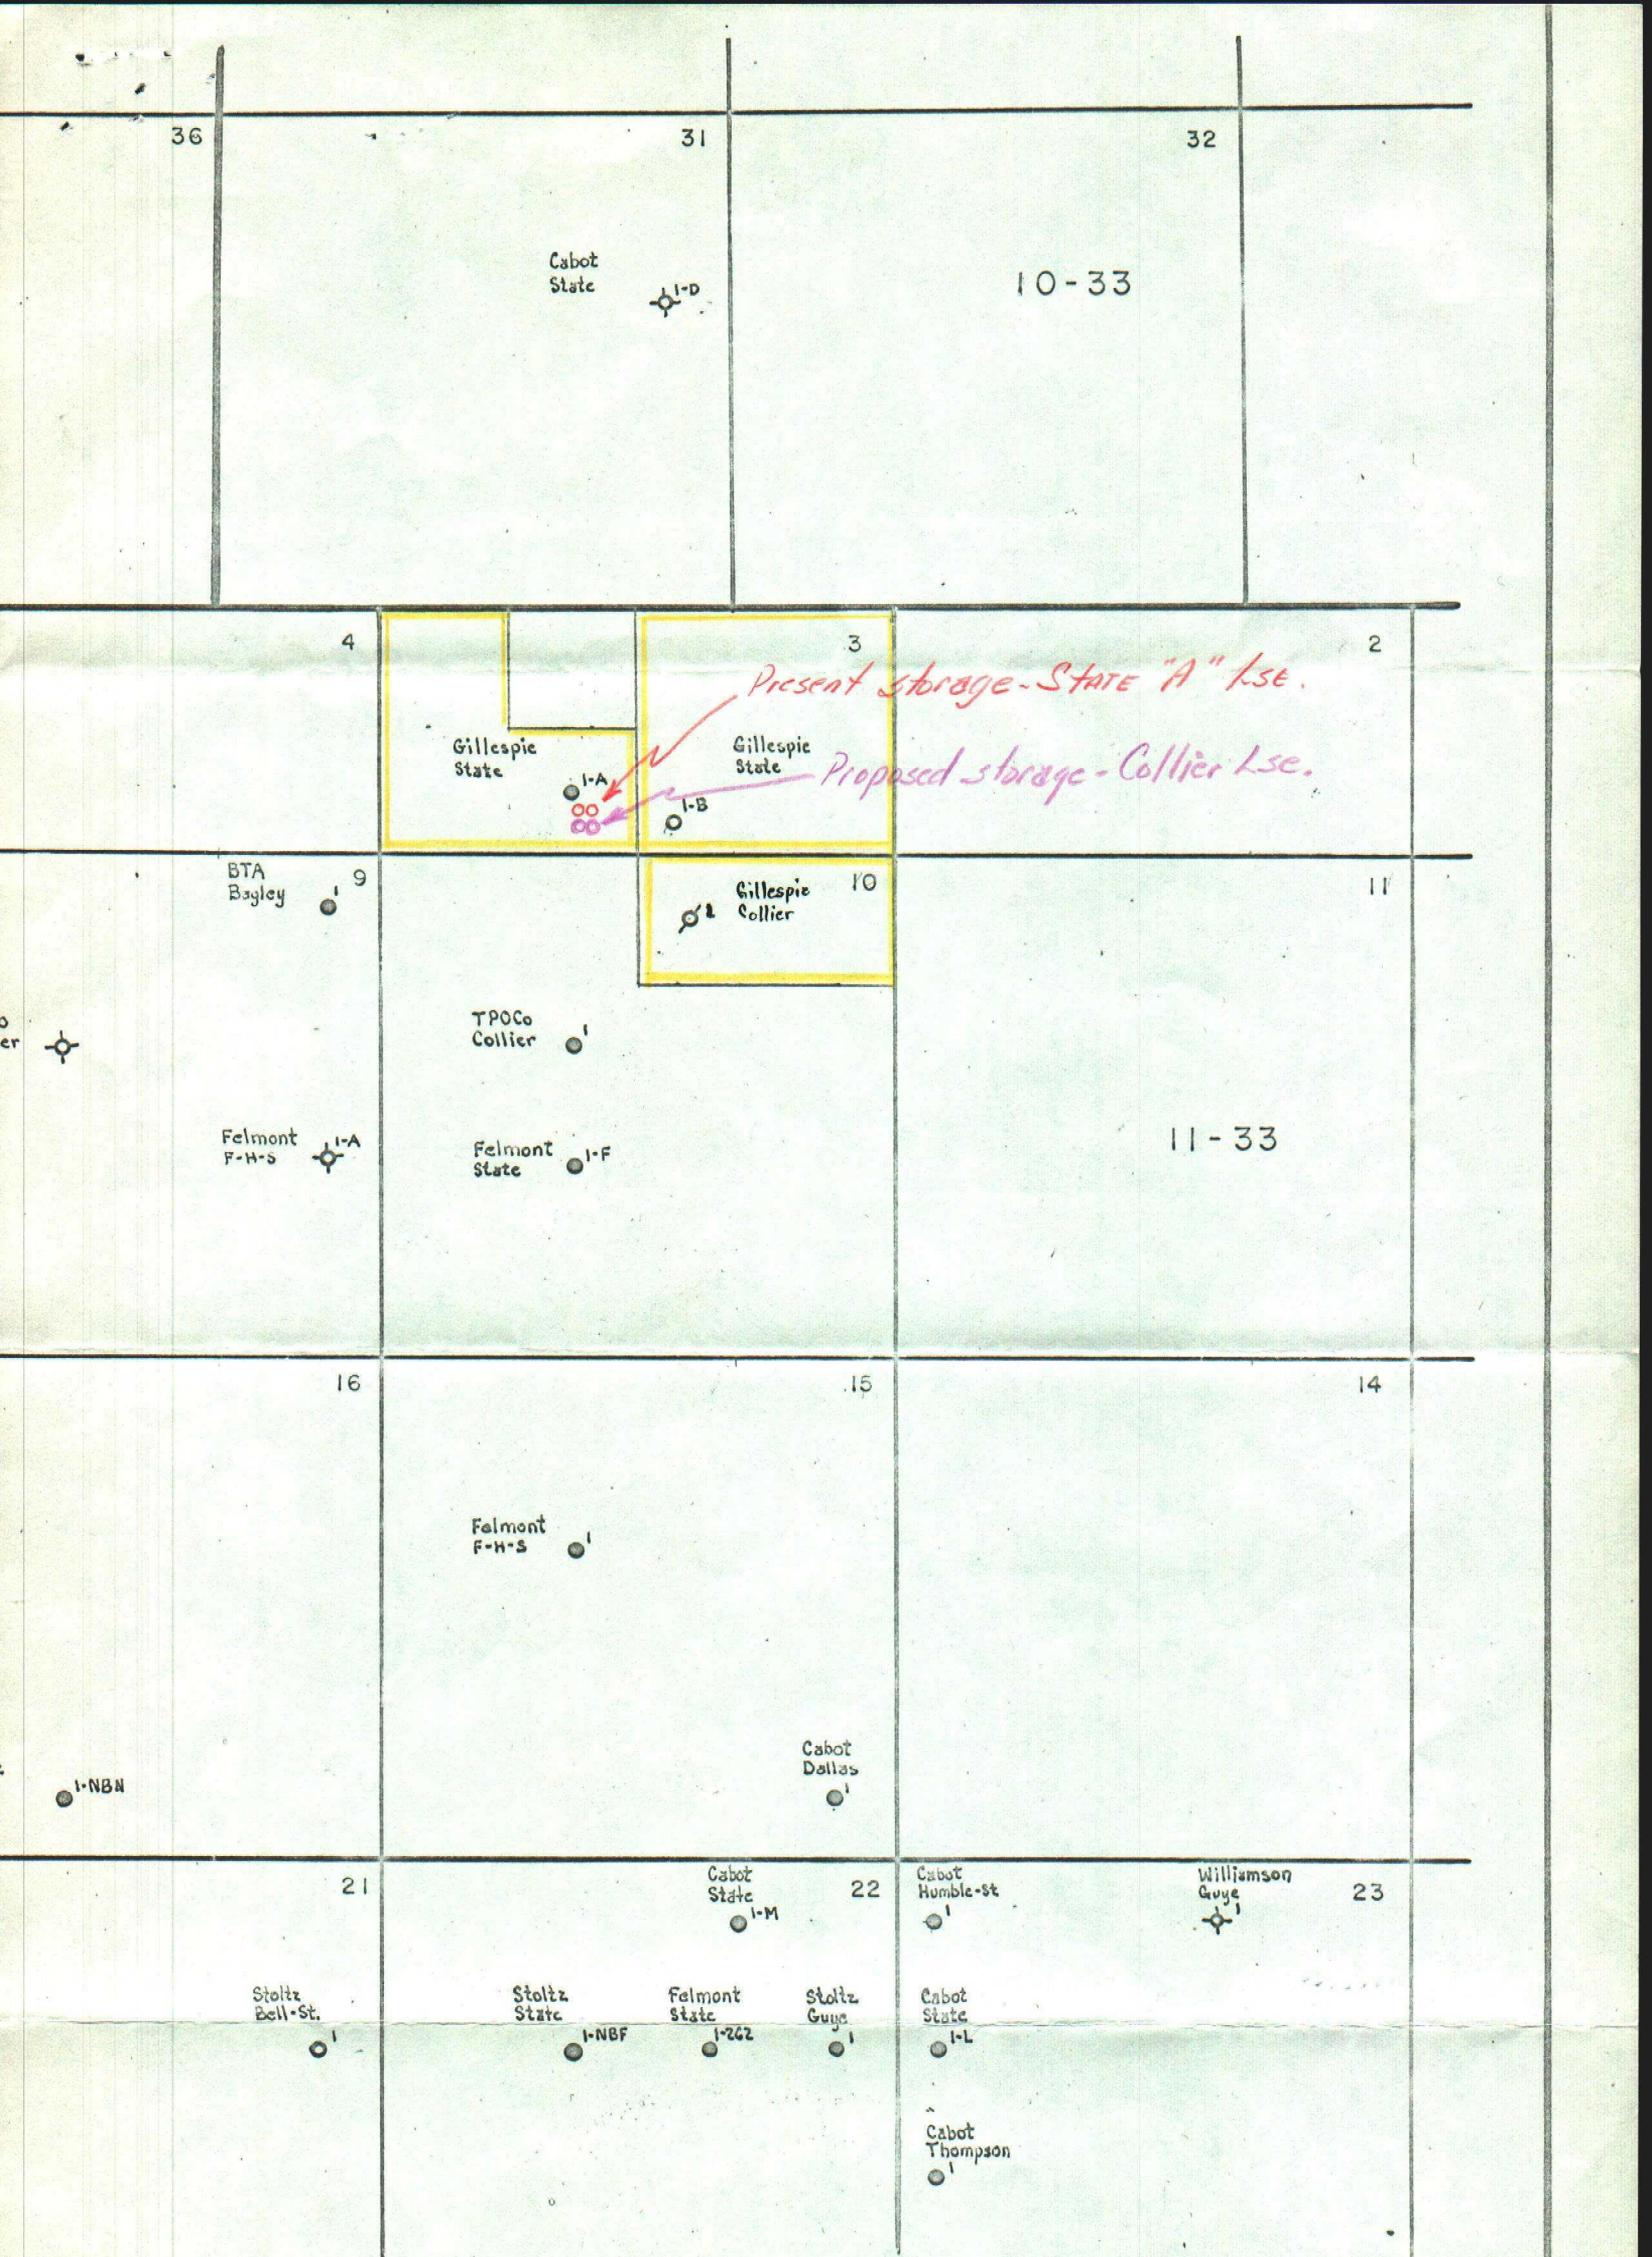

It is our understanding that the tank battery for this well would be located on your Gillespie State Lease in Unit N of Section 3, Township 11 North, Range 33 East. Inasmuch as commingling of production from the two leases will not result, and there will be no intercommunication of the handling, separating, treating, or storage facilities designated to each lease, the above-described off-lease storage is hereby approved.

Very truly yours,

A. L. PORTER, Jr.,  
Secretary-Director

Santa Fe, New Mexico

Att: Mr. D. F. Nutter  
Chief Engineer

Dear Sir:

I would like for this letter to constitute my formal request for Oil Conservation Commission approval of Off-lease storage for the well to be known as the Charles B. Gillespie, Jr. # 1 Collier which will be located 2130' FEL and 660' FNL, Section 10, T-11-S, R-33-E, Lea County.

I would propose that the tank battery be located in Unit N of Section 3, T-11-S, R-33-E. There will be no co-mingling of any kind. Storage will be kept in separate tanks, and production will be into separate vessels.

The reason for this request is that the present holder of the grazing leases of the acreage involved has requested that, if possible, all batteries be placed in a central location in order not to use as much land. Of course, his reasoning is based on the present condition of his grass, and he needs as much grass as possible.

I appreciate your consideration of this request and hope for a favorable reply.

Yours truly

  
Charles B. Gillespie, Jr.
