

COMMERCIAL OIL COMPANY

McAll, New Mexico

Indian Oil Conservation Commission
P.O. Box 571
Albuquerque, New Mexico

Attest: Mr. A. L. Porter, Jr., Secretary-Treasurer

Re: Continued Oil Company application
for commingling production after
separate measurement from the Monument,
Weir, Monument Gas, Monument Tubb,
and Undesignated Blinberry Pools on
its Briff 8-15 lease, located in
Section 14, T-20S, R-37E, NMPM,
Lea County, New Mexico

ILLEGIBLE

Complaint:

Continental Oil Company respectfully requests administrative approval
under the provisions of Executive Order 103 (a) for commingling production
from the Monument, Weir, Monument Tubb Gas, Monument
Tubb, and Undesignated Blinberry Pools on its Briff 8-15 lease consisting of
the 1/2, 1/4 of Section 14, T-20S, R-37E, NMPM, Lea County,
New Mexico.

Approval to commingle oil production from the Weir Pool, condensate
produced from the Weir Tubb Gas Pool, oil produced from the Weir Tubb
Gas Pool, and oil production from the Monument lease on the Briff 8-15 lease
was granted by Administrative Order 10-12 dated July 16, 1960. Subsequent
to the issuance of Order 10-12 the Weir Tubb oil pool on the Briff 8-15
lease was designated as a Monument Tubb Pool and approval to commingle
production from this pool under the provisions of Order 10-12 was granted
by Administrative Order 10-12 in a letter dated August 2, 1960.
It is requested that Order 10-12 be amended to include this change in
the designation and to also include oil production from an Undesignated
Blinberry Pool.

To support this request, the following information is required
to be furnished:

1. The pool on the Briff 8-15 lease is a single common
source of oil, and the wells therein are completed, cased, and
operated so as to prevent communication, within the pool bore, with any other

2. The gravities, values, and volumes of the liquid hydrocarbons produced on the Britt B-15 lease are as follows:

<u>POOL</u>	<u>AVERAGE GRAVITY DEGREES API AT 60°F</u>	<u>MARKET VALUE DOLLARS PER BBL.</u>	<u>AVERAGE DAILY PRODUCTION-BBLS.</u>	<u>VALUE OF PRODUCTION</u>
Monument (Oil)	31.0°	\$2.83	121	\$342.43
Weir Tubb (Condensate)	47.0°	\$2.95	85	\$250.75
Monument Tubb (Oil)	37.5°	\$2.95	112	\$330.40
Weir (Oil)	36.6°	\$2.93	13	\$ 38.09
Undesignated Blinebry	38.4°	\$2.97	$\frac{45}{376}$	$\frac{\$133.65}{\$1,095.32}$

3. The expected gravity of the commingled liquid hydrocarbons is 37.6° A.P.I.

4. The expected value of the commingled liquid hydrocarbons is \$1,109.20.

5. The commingled liquid hydrocarbons will have an average value of .13.88 more per day than the non-commingled production.

6. Copies of this application have been furnished this date by registered mail to all persons owning any interest of record in the subject acreage.

Attached hereto are a schematic diagram of the proposed installation and plat showing the location of all wells on the Britt B-15 lease and the pool from which they are producing.

The granting of this application is in the interest of preventing waste and the protection of correlative rights.

In view of the facts set out herein it is respectfully requested that the Commission amend Order No. PC-12 to approve commingling production after separate measurement from the Monument, Weir Tubb Gas, Monument Tubb, Weir, and Undesignated Blinebry Pools of Continental Oil Company on Britt B-15 Lease.
