Gentlemen:

Amendment dated March 14, 1963 to Administrative Order PC-73 authorizes the commingling of our State "CK" Lease, located in Section 19, T-21-S, R-37-E, Lea County, New Mexico, production from the Penrose-Skelly, Drinkard, Paddock, and Blinebry Oil Pools. Production from each pool is separately measured except that of the Blinebry Oil Pool which is determined by the deduction method.

All zones in all three wells are marginal and are incapable of producing their top unit allowable. Attachment I depicts production for January and February for all wells in all zones.

In view of the above, we propose that Administrative Order PC-73 be amended to provide for commingling without separately measuring the production from any zone. Pool and well production to be allocated on a well test basis to be taken periodically. Attachment II is a schematic of the proposed installation.

Attachment III reflects the relative location of the lease, wells, and commingled battery.

There is no diversity of ownership between zones of the lease.

~~Yours very truly,~~

V. E. Staley  
Area Superintendent
