HOBBS, NEW MEXICO 88240

New Mexico Oil Conservation Commission  
P.O. Box 2088  
Santa Fe, New Mexico

Re: Revision of Commission Order  
PC-81, Commingle of Production  
A.H. Blinebry (NCT-3) Lease  
Lea County, New Mexico

Attention: Mr. A. L. Porter, Jr.

Gentlemen:

Texaco Inc. respectfully requests permission to commingle liquid production without measuring the separate production from the Blinebry and Brunson Ellenburger (Oil) and Blinebry and Tubb (Gas) Pools on the A.H. Blinebry (NCT-3) which consists of the N/2 NW/4, SW/4 NW/4, and NW/4 NE/4 of Section 31, T-22-S, R-38-E, Lea County, New Mexico.

Commission Order PC-81 granted authority to commingle the production from the aforementioned pools after separate measurement of production from each pool. Since the initiation of this procedure, production into the battery on the subject lease has declined to a marginal status for all wells in the pool being commingled in this battery. In support of this, a tabulation of the average daily production over a 60-day period has been attached.

In accordance with NMOCC "Manual for the Installation and Operation of Commingling Facilities," Section II - "Commingling Between Pools and Zones," Item I - "Marginal Zones," commingled production may be permitted without separately metering each zone if production is then based on periodic well tests.

Working and royalty interests are identical in all zones on the lease. Royalty interests in the lease includes the U.S. Geological Survey and copies of this application are being sent to U.S.G.S., P.O. Box 1157, Hobbs, New Mexico, requesting consent in writing to the proposed commingling operation. The U.S.G.S. will then forward their consent directly to the Commission of Santa Fe.

Yours very truly,

  
S. V. Gannon

District Superintendent
