Re: Revision of Administrative Order
PC-82, TEXACO Inc., Commingling
on G. L. Erwin "a" Lease,
Lea County, New Mexico

ATTENTION: Mr. A. L. Porter, Jr.

Gentlemen:

TEXACO Inc. respectfully requests revision of Administrative Order PC-82, revised July 20, 1962, to authorize commingling of the production from the North Justis Tubb-Drinkard, North Justis Devonian and Justis Blinebry Pools without separately measuring the production prior to being commingled. Order PC-82 authorized commingling between these pools on the G. L. Erwin "a" Lease after separately metering the production from the Tubb-Drinkard and Devonian zones and using the subtraction method for determining the Blinebry zone production. Currently, no well on the aforesaid lease is capable of producing top allowable for each respective pool; therefore, commingling without separate measurement is being requested. This method of commingling is authorized in Section II, Item 1, of the current New Mexico Oil Conservation Commission "Manual for the Installation and Operation of Commingling Facilities".

Attached is a 60-day production tabulation for each well on the lease and a revised diagrammatic sketch of the proposed tank battery. Metering test facilities shall be provided for accurately determining the producing capacity of each well at reasonable periodic intervals and the production from each well shall be allocated on test basis. The production from each well and each pool shall be separately reported each month.

Your early consideration of this method of commingling on the subject lease shall be appreciated.

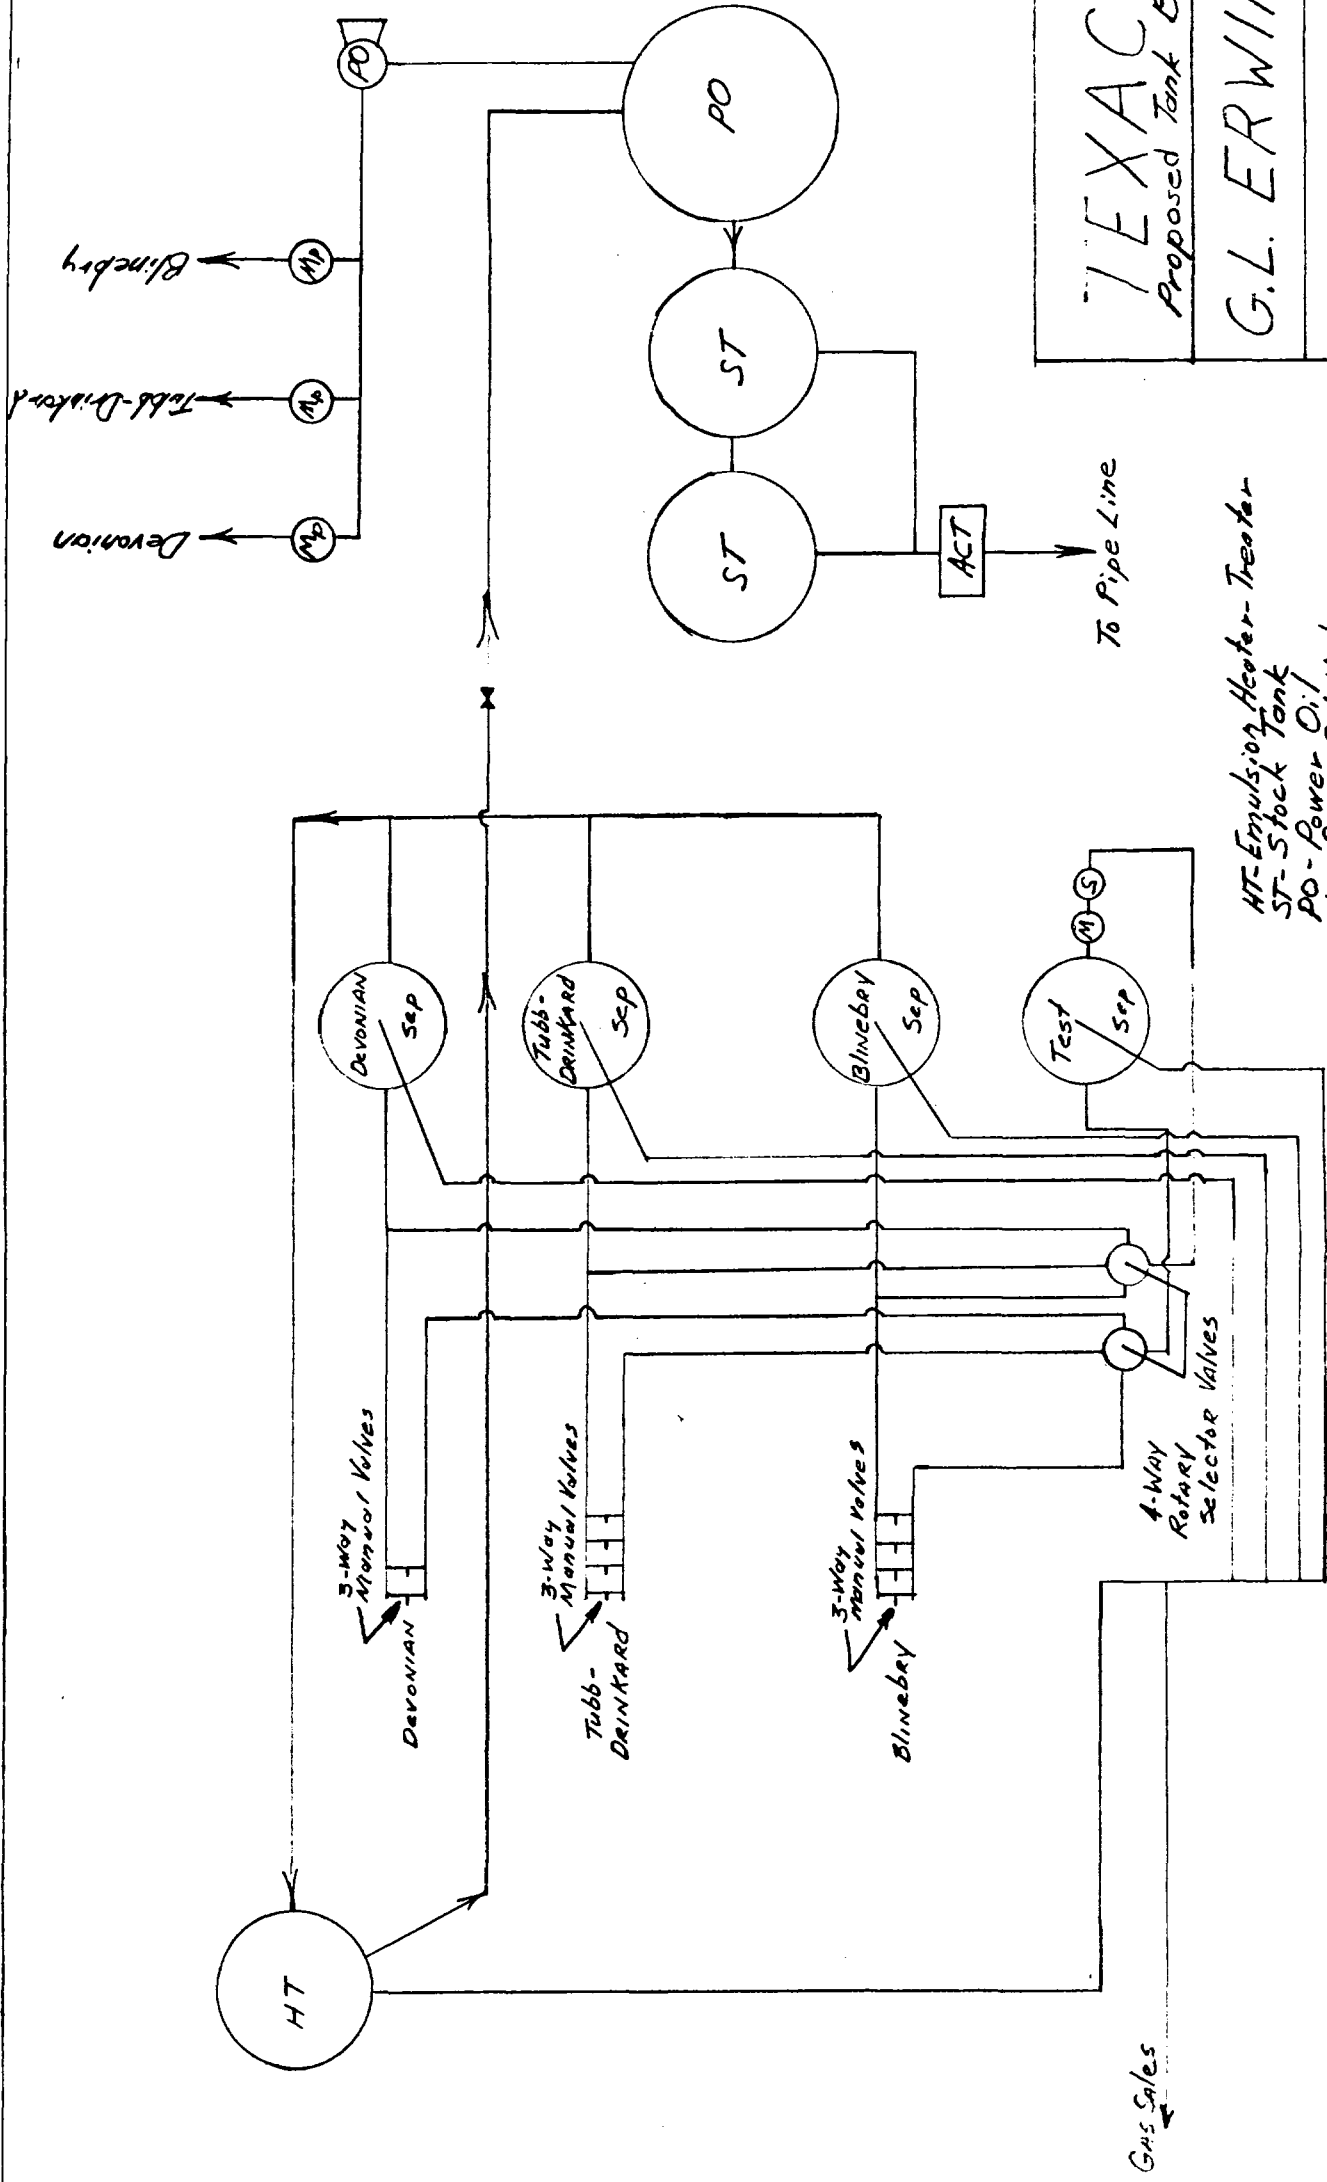

Yours very truly, ,

J. G. Blevins, Jr.
J. G. Blevins, Jr.
