Re: Amendment to Administrative  
Order PC-101, State A-2 Lease  
2-255-37E, Lea County, New Mexico

Gentlemen:

Administrative Order PC-101, as amended, requires that production from each of the pools being produced on the lease be metered with the exception of the North Justis Devonian which will be determined by means of the subtraction method. As shown by the attached tabulation of well tests, all wells on the lease have declined below top allowable rate. Therefore, it is respectfully requested that Administrative Order PC-101 be further amended so as to permit the commingling of production on this lease without the necessity of metering so long as production from all zones remains below top allowable.

Yours very truly, (

VTL-JS
