Dear Sir:

Your administrative approval is requested to amend Administrative Order PC-138 to include commingling the Blinebry condensate from our Nancy Stephens lease, Section 20, 21-S, 37-E, with the Blinebry Oil and Drinkard Oil.

The Nancy Stephens No. 1 has been reclassified from an oil well to a gas condensate well due to GOR in excess of 32,000/1.

The Blinebry oil and Drinkard production has already been commingled as authorized by PC-138.

The gravity of the Blinebry condensate is the same as the Blinebry oil and Texas-New Mexico Pipeline Company has agreed to purchase the commingled production.

This is fee land and does not require approval from the State Land Commissioner.

Yours truly,

BY: 

C. D. BORLAND
