Re: Heasley State Lease
Section 5-21S-36E,
Lea County, New Mexico

New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Attention: Mr. A. L. Porter, Jr.

Dear Sir:

Gulf has completed its Heasley State No. 8 in the Oil Center Hlinebry Pool. This is the only Oil Center Hlinebry production on the Heasley State Lease and Gulf would like to commingle the Hlinebry and Eunice crude oil production to eliminate the need for additional treating and storage facilities.

Gulf hereby seeks administrative approval from the Oil Conservation Commission to commingle the Oil Center Hlinebry and Eunice crude oil production on the Heasley State Lease. Attached is a schematic diagram of the proposed installation along with a plat of the Heasley State Lease. Since the wells involved are marginal producers, the production from each well and from each pool will be determined from well tests conducted periodically as the Commission prescribes in the order authorizing the commingling. Also attached is a 60 day production tabulation from the Eunice Pool and since the Oil Center Hlinebry well has no production record, the allowable test for the Hlinebry well.

The following tabulation shows the volumes, gravities and monetary values of the liquid hydrocarbons from the individual pools as well as the commingled production:

<u>Pool</u>	<u>Bbls/Day</u>	<u>Gvty.</u>	<u>\$/Bbl.</u>	<u>Bbl/Day x \$/Bbl.</u>
Oil Center Hlinebry	44	41.2	\$3.01	\$ 132.44
Eunice	73	33.5	\$2.87	\$ 209.51
				\$ 341.95
Commingled	117	36.3	\$2.93	\$ 342.81

The actual commercial value of the commingled production will be slightly more than the sum of the values of the production from the individual pools.

This commingling proposal is in the interest of conservation in that it prevents unnecessary waste.

Yours very truly,

C. D. BORLAND
Area Production Manager
