RE: REQUEST FOR EXCEPTION TO RULE
303-A, SOCONY MOBIL OIL COMPANY'S
BRUNSON ARGO LEASE, LEA COUNTY,
NEW MEXICO

Dear Sir:

Socony Mobil Oil Company, Inc. respectfully requests the Commission administratively approve an exception to Rule 303-A to permit the commingling of the oil produced from the Blinebry, Drinkard, Hare, and Tubb Pools and also the condensate produced from the Blinebry Gas Pool on their Brunson Argo Lease located in the NE/4 of Section 9, Township 22 South, Range 37 East, Lea County, New Mexico. Production will be allocated to the zones involved by periodic well tests. All production from wells located in the NE/4 of Section 9 on this lease is marginal and none are capable of making top allowable.

Commingling on the Brunson Argo Lease in the NW/4 of Section 10, Township 22 South, Range 37 East was approved by New Mexico Oil Conservation Commission Order No. R-2153.

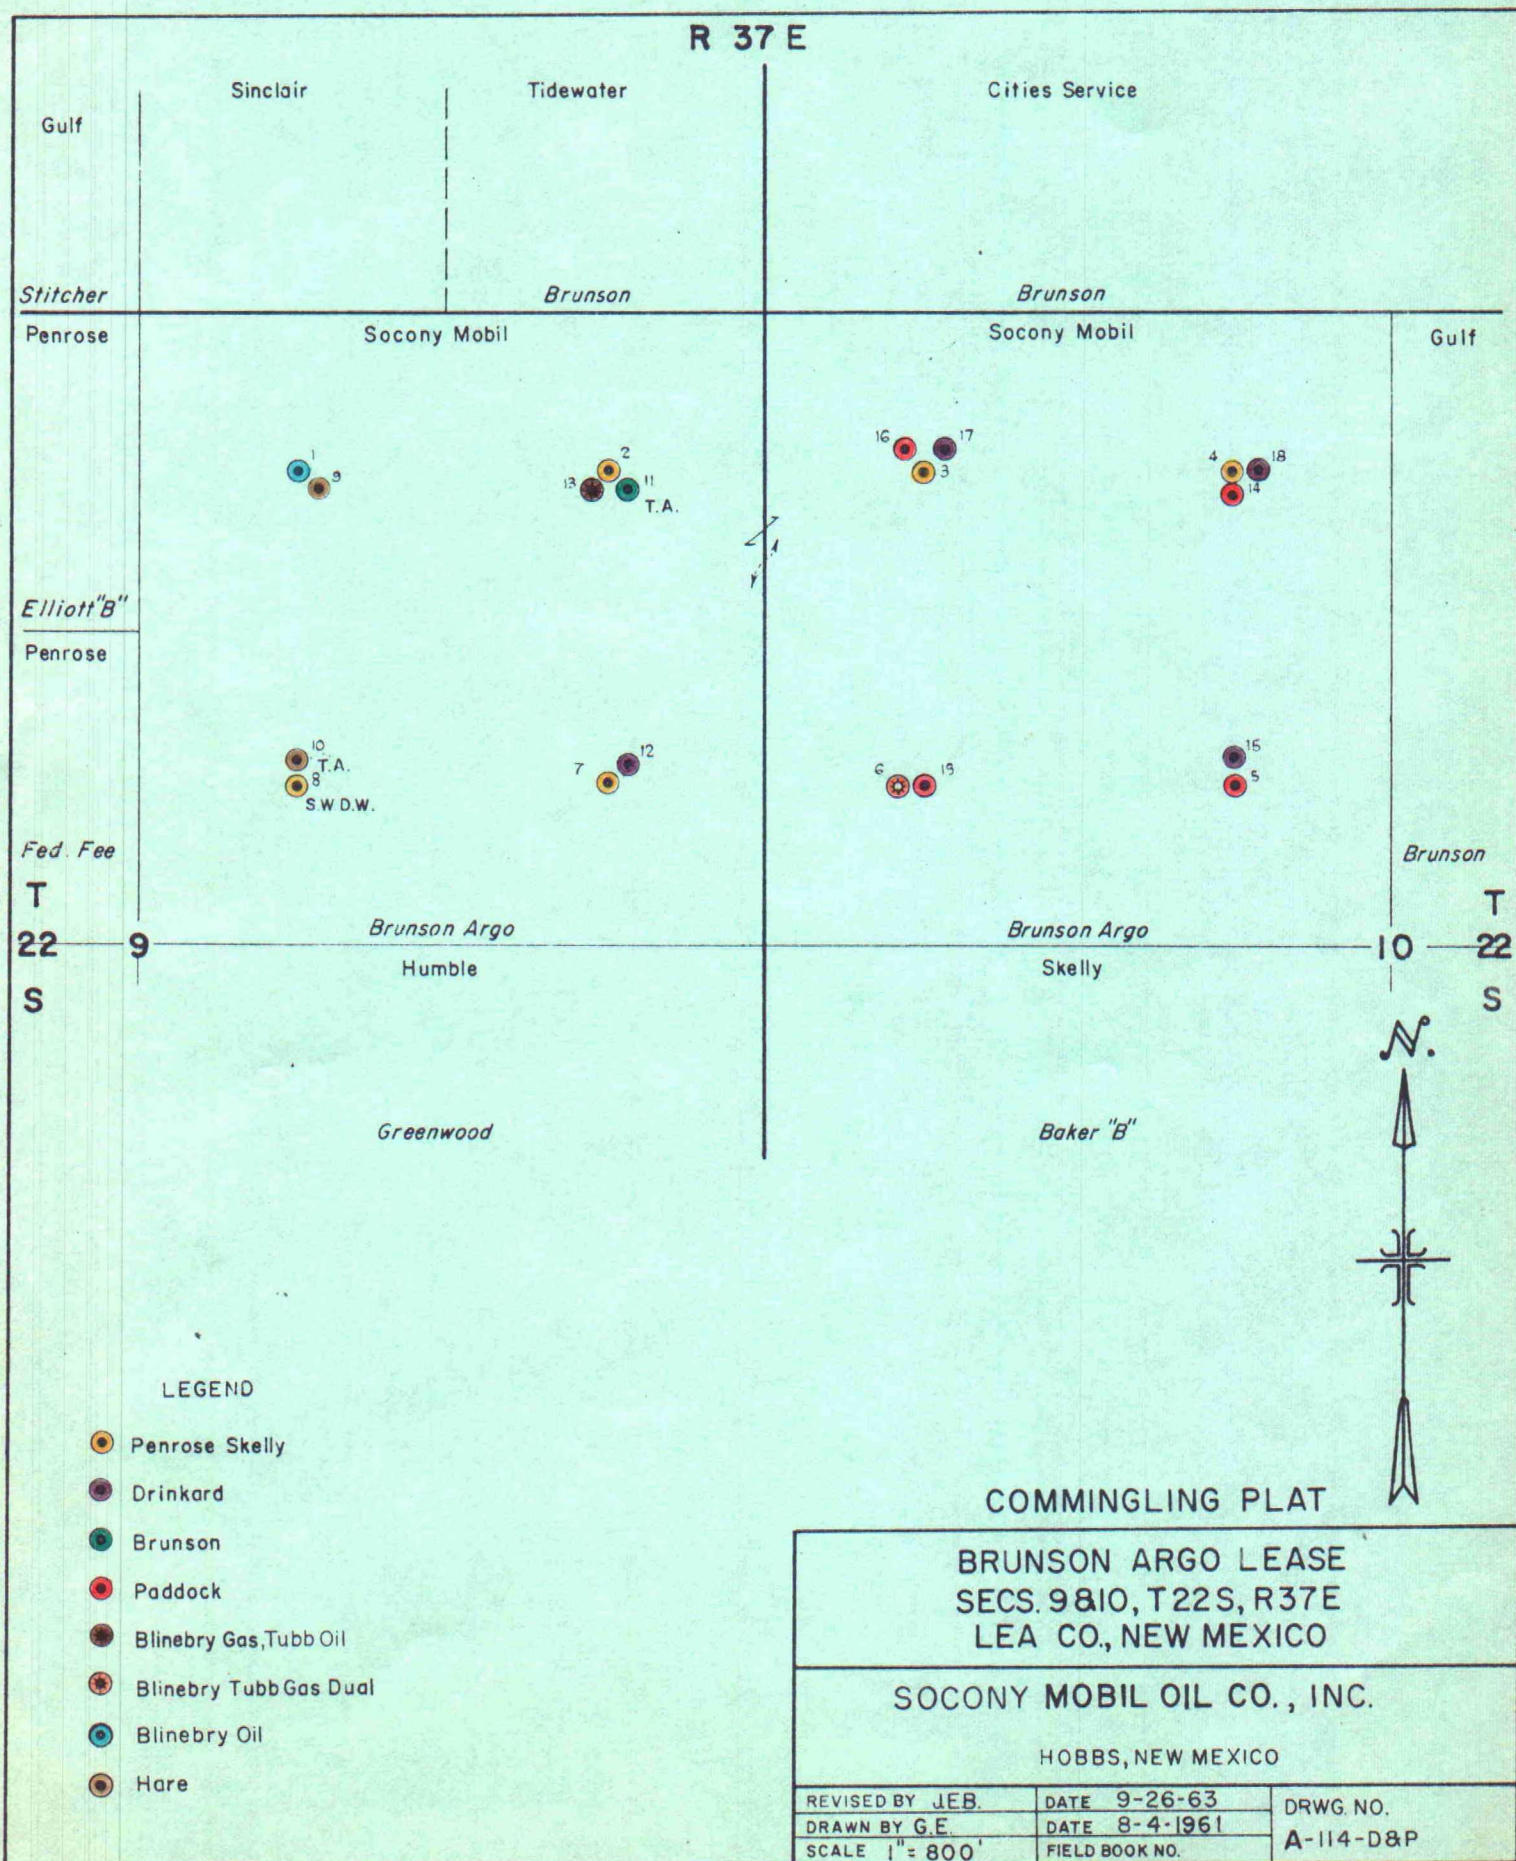

Attached is a location plat, schematic diagram of the proposed installation, and a production tabulation. It was impossible to show the average daily production over a 60 day period for Brunson Argo No. 13, a recent recompletion in the Blinebry Gas Pool and Tubb Oil Pool. The completion date of this well was August 18 for the Blinebry zone and September 5 for the Tubb zone. Potential tests of both zones indicated marginal production. The production from both zones from this well to date are included in the attached production tabulation.

If any additional information is needed concerning this proposal, please notify us.

Yours very truly,

Glen W. Barb
Producing Superintendent
