Gentlemen:

Amendment to Commingling Order - Lockhart A-35 Lease

Administrative Order PC-169 dated September 24, 1968, gave authority to commingle the Blinebry, Drinkard and Wantz Abo oil production and Blinebry distillate production from the Lockhart A-35 lease after metering the Drinkard oil and Blinebry distillate production.

We respectfully request the order be amended to allow commingling after metering the Blinebry distillate only.

Attached is a list of the most recent tests. As can be seen, there are no top allowable wells and no penalized wells. Also attached is a schematic showing the proposed commingling and a lease plat showing wells involved, as well as a letter of approval from U.S.G.S.

Yours very truly,

L. P. Thompson

Gentlemen:

Your letter of September 17, 1974 requests approval to modify the commingling system approved in our letter of August 16, 1968, for your Lockhart A-35 in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ and E $\frac{1}{2}$ NW $\frac{1}{4}$ of section 35, T. 21 S., R. 37 E., Lea County, New Mexico, lease Las Cruces 032096(a). You now propose to discontinue separate measurement of Drinkard oil production and now only separately measure Blinebry distillate production.

In view of only the Blinebry distillate completion being able to produce its allowable, the system as proposed is hereby approved subject to like approval by the New Mexico Oil Conservation Commission.

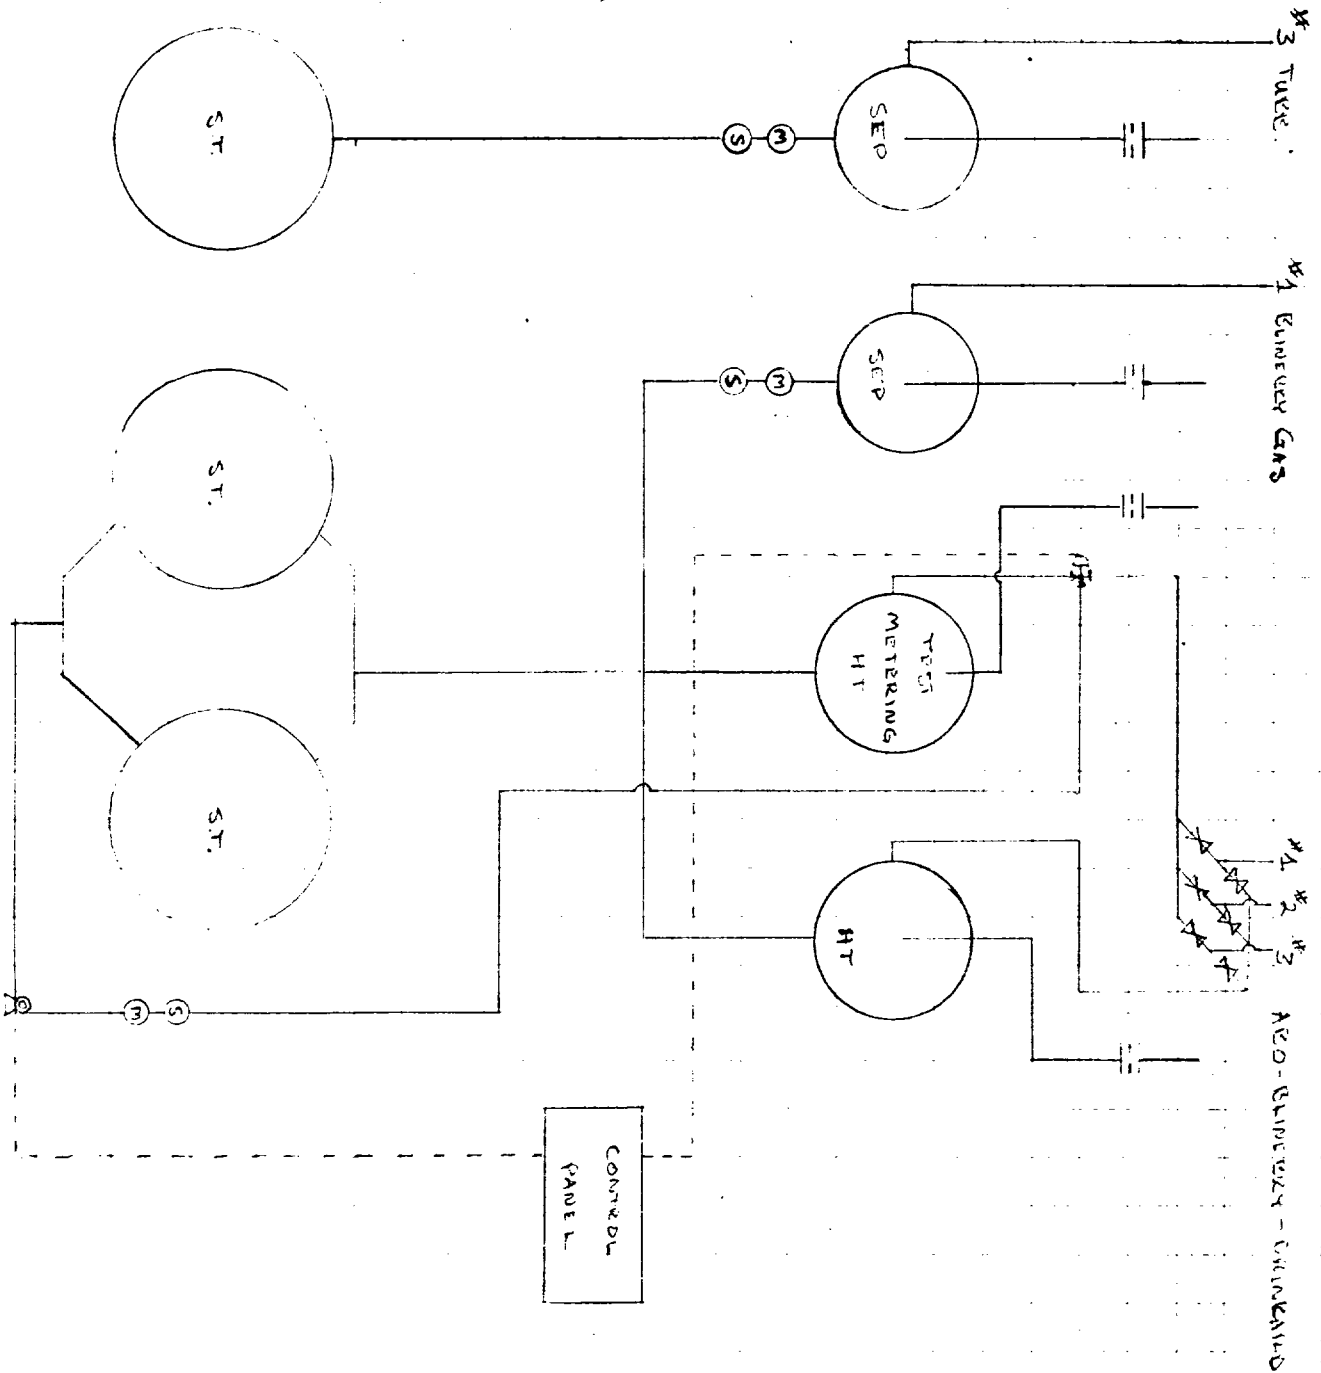

Please notify our Hobbs office upon completion of modification of the producing facilities.

Sincerely yours,

Arthur Brown
