THIRD AMENDMENT
COMMINGLING ORDER PC-219

Arco Oil & Gas Company
New Mexico-Arizona District
P. O. Box 1710
Hobbs, New Mexico 88240

Attention: Marvin T. Iglehart

Lease Name: Sarkeys Lease

The above-named company is hereby authorized to commingle Blinebry condensate, Blinebry oil, Wantz Abo oil, Drinkard and Tubb condensate production in a common tank battery and to determine the production from each pool by well tests. (If this method is to be authorized, all commingled production must be of marginal nature; further the operator shall notify the Santa Fe Office of the Division in the event any well in the commingled battery becomes capable of top allowable production, at which time the Division will amend this order or take such other action as may be appropriate.)

NOTE: This installation shall be installed and operated in accordance with the applicable provisions of Rule 303 of the Division Rules and Regulations and the Division "Manual for the Installation and Operation of Commingling Facilities." It is the responsibility of the producer to notify the transporter of this commingling authority.

REMARKS: This amendment allows for the addition of the Tubb condensate produced from S. J. Sarkeys No. 5, Unit O, Section 23, Township 21 South, Range 37 East, to be surface commingled with the production as listed above.

As per Amendment No. 2, authorization shall remain to determine production allocation by means of well tests, instead of separate metering. Also, the requirement that casing head gas produced from Sarkeys Wells Nos. 3 and 4, be metered separately shall remain in effect.

DONE at Santa Fe, New Mexico, on this 12th day of
February, 1985.
