Re: Surface Sealing
Oil Well "A"
Santa Fe, New Mexico

Attention: Mr. Joe L. Wiley

Dear Sir:

On November 4, 1974, after Administrative Order 80-403, Texaco Inc. was granted an order from the New Mexico Oil Conservation Commission to surface sealable production from the charge, charge, and last air line pools on the well "A" located at the 1/2 1/4 of section 12, Township 20 North, Range 37 East, T10N, R37E, S20N, New Mexico.

On October 4, 1975, after Administrative Order 80-403, Texaco Inc. was granted an order from the New Mexico Oil Conservation Commission to surface sealable production from the charge, charge, and last air line pools on the well "A" located at the 1/2 1/4 of section 12, Township 20 North, Range 37 East, T10N, R37E, S20N, New Mexico.

At this time, the oil conservation commission, production from the 1/2 1/4 and the 1/2 1/4 of section 12 could not be conserved because of diversification in the royalty interest in the charge, charge, and last air line pools. At the present time the charge, charge, and last air line pools are being water-flooded, project and all production is placed in a centralized custody which is managed from the field in question. Therefore, the royalty interest from the existing pools is common.

Texaco requests the Administrative Order 80-403 be cancelled and Administrative Order 80-403 be amended to include the Royalty and Production from the well "A" located in the 1/2 1/4 of section 12 and the charge, charge, and last air line pools.

The growth of the combined shell zone is 43.4° /mi. with a value of 49.3° per decade. The ΔT of the George Drifted, near Florida, is 41.4° /mi. and the growth is 35.4° /mi. with a value of 39.3° per decade. The expected growth of the cooling is zone is 36.4° /mi. with a value of 49.3° per decade. The ΔT of the combined zone of 1.5° per day.

It is recommended that production be suspended on all rail road units until such time as the manufacturer of production to rail service is notified of the status of production from this.

A complete copy of the proposed amending
 instructions and form of application are attached.

With the aid of the new production method, production is being carried out on a large scale.
