Gentlemen:

Texaco Inc. respectfully requests that Commingling Order PC-243 be amended to include liquid production from the Skaggs Abo gas zone. M. B. Weir "B" Well No. 11 was completed in January, 1985 to the Abo and potentialed at a CAOPD of 3,036 MCFPD. The well has been shut-in since then awaiting hookup to a gas sales line. A gas contract has been recently negotiated and sales should begin by May, 1986. Although tests indicate no condensate production, it is expected that the well will yield 2 BOPD based on offsetting Abo production.

Presently, all liquid production on the subject lease is surface commingled and is allocated by monthly well tests at the lease battery. A copy of the State Form C-115 for the month of January, 1986 is attached for your review.

Texaco possesses a working interest of 100% in this lease, and royalty interest is common for all pools on the 160 acre lease. A plat of the lease is included showing the location of the producing wells and the pools produced by each well. Also attached is a plat of the lease battery where the per well-per pool tests will be determined by the subtraction test method.

Your timely consideration of this proposed amendment
