Re: Request to Commingle Production
State "C" Tract 13 Lease
State Lease No. B-1557

Gentlemen:

After careful review of your case and after studying your proposed metering system, we find that we have no objection to your proposed installation.

The Commissioner of Public Lands approves your above request, subject to the approval of the New Mexico Oil Conservation Commission. This approval is given with the understanding that the Commissioner of Public Lands may amend or withdraw his approval should the installation at any time cease to be beneficial to the State of New Mexico.

Very truly yours,

GUYTON B. HAYS
Commissioner of Public Lands

Santa Fe, New Mexico

— 252

Dear Sir:

Pan American Petroleum Corporation hereby submits application for the commingling of oil production by separately metering the Drinkard (Oil), Blinebry (Oil), and Tubb (Condensate) on the State "C" Tract 13 Lease, Lea County, New Mexico.

In support of our request for exception to Rule 303 (A) to permit commingling of commonly owned production from two or more common sources of supply, the following is submitted.

1. Plats of the State "C" Tract 13 Lease showing thereon all wells and the formations in which they are completed.
2. Schematic diagram of the proposed commingling facility located in the NE/4 of NW/4 Section 36, Township 21 South, Range 37 East, Lea County, New Mexico.
3. Production from each common source of supply will be metered and sampled separately and a B&W reading will be taken every eight days and the production recorded.
4. The purchaser of the commingled production will make settlement on the basis of representative gravities from each individual zone and the metered volume from each zone. Therefore, there will be no changes in the commercial value of the liquid hydrocarbons as a result of commingling.

Yours very truly,

W. E. Staley
Area Superintendent
