Re: Weatherly Lease  
Section 21  
Township 21-S  
Range 37-E  
Lea County, New Mexico

Dear Mr. Porter:

N. B. Hunt as operator requests exception to Rule 303 in order to commingle the marginal zones of the Blinebry and Drinkard of the above subject lease. All wells in each pool are physically incapable of producing top unit allowable for their respective pools.

Production data from the Blinebry and Drinkard is as follows:

BLINEBRY

API Gravity @ 60°F      37.4°      Top Allowable 107 Barrels

| <u>MONTH</u>  | <u>PRODUCTION</u> | <u>AVERAGE DAILY PRODUCTION</u> |
|---------------|-------------------|---------------------------------|
| January, 1971 | 1,832 Barrels     | 59 Barrels                      |
| February      | 1,416             | 50                              |
| March         | 1,424             | 46                              |
| April         | 1,410             | 47                              |

DRINKARD

API Gravity @ 60°F      38.8°      Top Allowable 142 Barrels

| <u>MONTH</u>  | <u>PRODUCTION</u> | <u>AVERAGE DAILY PRODUCTION</u> |
|---------------|-------------------|---------------------------------|
| January, 1971 | 469 Barrels       | 15 Barrels                      |
| February      | 673               | 24                              |
| March         | 418               | 13                              |
| April         | 356               | 12                              |

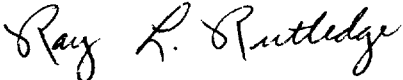

The value of the commingled production will not be less than separated production.

Mr. A. L. Porter, Jr.  
Weatherly Lease  
Lea County, New Mexico
