Mr. A. L. Porter, Jr.
Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico 87501

Dear Sir:

In order to avoid considerable expense in repairing and maintaining the above mentioned tank battery, Gulf hereby seeks Administrative approval to commingle Monument, Monument Blinbry and Monument Paddock production by consolidating the tank battery. The wells producing from all pools are marginal and will be tested periodically for allocation of production.

The attached tabulation shows the volumes, gravities, and monetary values of the liquid hydrocarbons from the individual pools, as well as the commingled production.

The calculated revenue from the commingled production will be slightly more (82¢/day) than the total revenue from the individual pools.

Attached is a schematic diagram of the proposed installation, along with a lease plat. Also attached is a letter of approval from Shell Oil Corporation and a tabulation of the total average daily production for a 60 day period.

This commingling proposal is in the interest of conservation in that it prevents unnecessary waste and production expense.

Yours very truly,

C. D. BORLAND
Area Production Manager

Gulf Oil Corporation
Post Office Box 1150
Midland, Texas 79701

Attention Mr. C.W. Briggs

Gentlemen:

This is to confirm our conversation wherein you stated that the Eunice Monument, Monument Bluebry and Monument Paddock production is presently being run from separate tank batteries and it is your desire to commingle all of the production into one tank battery.

We are agreeable to purchasing the commingled production and would appreciate if you would advise us when the actual commingling takes place so we may notify our pipeline carrier to run the commingled production for our account.

Yours very truly,
